Introduction

Welcome

The Takeda Global Brand Guidelines have evolved in tandem with the transformation of Takeda itself, maintaining the core concepts and style laid out in the 1st edition, while adapting to provide an agile, clean framework that serves the needs of all areas of our growing business.

With Takeda now having a presence in approximately 80 countries and regions, it is more important than ever that we demonstrate a solid corporate identity that reflects our status as a global industry leader. By consistently using this carefully developed framework in all communication materials, a strong identity can be fostered worldwide.

This guide will give you confidence that your creative projects will reinforce Takeda’s global brand identity and still give you the flexibility to communicate your message.

We appreciate your careful attention to the details laid out in the following pages, and look forward to seeing the results of your creative implementation of these guidelines.

Version 9.0 Changelog

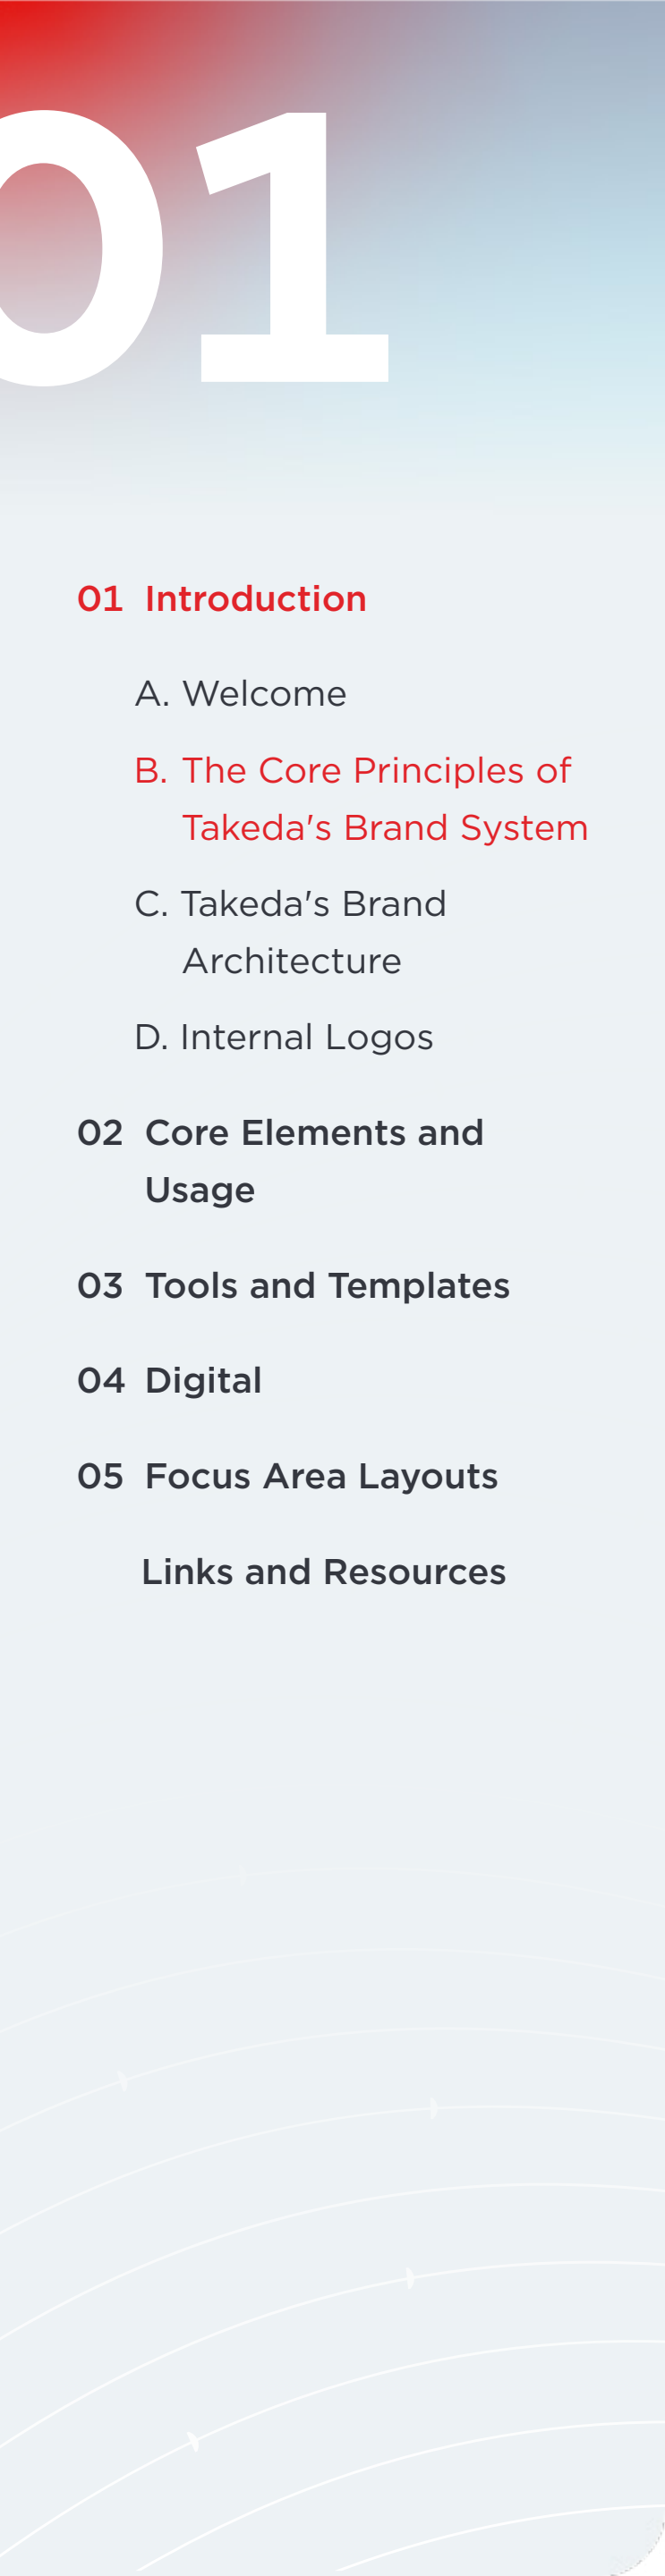

This latest version marks a continued evolution of the Takeda brand, building on the strong foundation established in Version 8 and developed with the needs of our diverse, global organization in mind.

This update introduces a new corporate color, Heron Blue, and additional visual assets such as color gradients and the Takeda pattern palette.

Together, these elements create greater flexibility and expression, enabling Takeda to be represented in a more distinctive and recognizable way. They reinforce a unique brand identity that honors our corporate heritage while signaling a forward-looking commitment to innovation in the pursuit of treatments for patients worldwide.

The guidelines are accompanied by an expanded library of templates, ranging from graphic design assets to motion and animation resources, to help teams bring the brand to life with clarity and consistency.

Feedback, questions and suggestions are welcome at Corporate_Branding@takeda.com

Introduction

The Core Principles of Takeda’s Brand System

We are guided by our values, which incorporate Integrity, Fairness, Honesty and Perseverance, with Integrity at the core. This means we put patients first, build trust, enhance our reputation and grow the business sustainably. We strive for collective success, are candid and embrace diverse perspectives and move at pace against ambitious goals.

At the same time, our direction is defined by our corporate narrative:

Takeda leads with a generational promise to boldly reinvent for a healthier world.

This reflects our belief that achieving a healthier future requires bold reinvention grounded in long-term vision, combining cutting-edge science, technology and partnerships with a deep, human-centric commitment to patients and the communities we serve.

Our brand is one of the ways this promise is made visible. Every interaction and every piece of communication is an opportunity to express our values and demonstrate this commitment in action. By applying these brand guidelines consistently across all channels, from videos to social media, presentations to printed materials, we create a clear, unified presence that reflects both who we are today and the future we are working to build.

Takeda-ism is embodied in our visual brand attributes:

Clear: Clean, confident layouts that use white space and a refined color palette, now expanded with Heron Blue, to create clarity and focus.

Connected: A rich system of color gradients that move across the palette, reflecting the breadth and interconnected nature of our work, from discovery to delivery and patient impact.

Distinctive: A set of evolving patterns and visual elements that create a consistent yet flexible identity, balancing heritage with modernity and enabling diverse expression across contexts.

Human: Authentic, diverse imagery that reflects real lives and experiences, grounded in empathy, progress and patient focus.

Forward-looking: Thoughtful use of motion, line and composition to convey momentum, innovation and our commitment to continuous reinvention.

05 Focus Area Layouts

Links and Resources

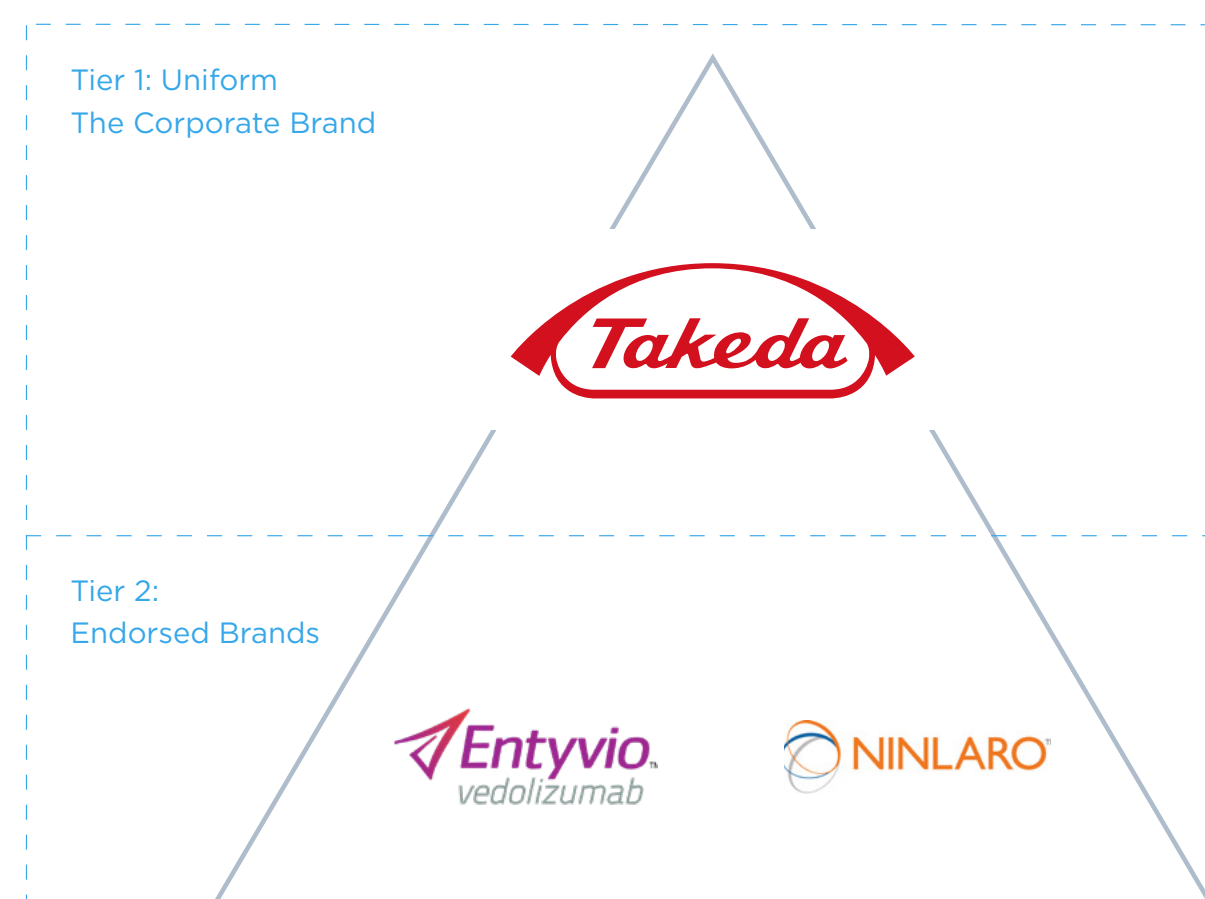

Our brand architecture refers to the hierarchy of brands within Takeda.

Tier 1: Uniform

The Corporate brand: Dakiyama

Tier 1 of our brand architecture is the corporate brand, represented by our single corporate logo: Dakiyama.

In principle, no additional sub-brands, logos or symbols may be created.

Tier 2: Endorsed brands

Product and approved external brands

Logos are allowed for product brands, product-related service brands, patient support programs and disease awareness campaigns.

If appropriate, the Dakiyama may appear with the product or external brand logo, separated by clear space and in a smaller size, as an endorsement of the brand.

Sub-brands and internal logos

Business units, functions, departments, and internal programs are discouraged from developing custom logos or individual identities. Please see the following page for details.

For more information regarding focus area logos, see [section 5.](#)

Introduction

Internal Logos and Brand Identities

It is important that we all strive to represent Takeda at the highest global level rather than look for opportunities to differentiate individually.

As such, in principle, logo and brand identity development for internal functions, business areas, LOCs, teams, projects, etc. are not supported.

The Corporate Branding Team now provides an expanded range of graphic assets in support of internal needs such as presentations, newsletter banners, communication materials, SharePoint banners, etc. Should custom materials be required, the design should be based upon corporate materials, templates and these guidelines.

Short-term, temporary visual designs may be used internally to represent meeting themes, transformation projects, enterprise-wide initiatives, etc. as needed. They should not include the Takeda name or Dakiyama, they should not be used externally, and they should be removed from circulation by the team or function in due time. They must also follow the permitted/not permitted guidance.

✔ Permitted

- PowerPoint templates: your internal logo should be positioned opposite the Takeda logo or in the header. Templates should have an “Internal use only” footer
- Internal meeting agendas or documents specific to the projects, invitations, logistics emails, etc.
- As supporting imagery on myTakeda pages, as an image in an internal function newsletter/email, etc.

✘ Not permitted

- On promotional items/branded goods such as pens, notepads, portfolios, power banks, bags, shirts, etc.
- In email signatures (internal or external)
- As the exclusive “logo” or visual design on external materials
- Should not include the Takeda name or Dakiyama

Core Elements and Usage

Dakiyama Corporate Logo

The history of the Dakiyama, "embracing mountains"

Our corporate logo, known as Dakiyama, originates from Takeda’s first brand symbol, Dakiyama Hon, which was used when the founder, Chobei I, established his first store in 1781.

Chobei established his business under the Omiya brand that had employed him as an apprentice.

Omiya used the Dakiyama symbol for their business. The outer frame depicts two mountains, one on top and one inverted, representing the mountain that Chobei would have to cross twice when traveling from his hometown of Omi (now

Shiga Prefecture) to work in Osaka. Chobei adopted this symbol along with his family’s kanji character (hon), meaning "true" or "main", placing it in the center of the Dakiyama.

The current Dakiyama symbol was modernized in 1961 to celebrate the 180th anniversary of Takeda.

A paperweight commemorating the renovation of the first store featuring the Dakiyama Hon symbol, the outline of which depicts a large mountain on top and a smaller mountain inverted at the bottom.

An apron worn by employees during the early twentieth century shows the Dakiyama Hon symbol.

This trademark symbolizing the pure white heron was developed by Takeda to be used for high-quality products that exceeded Japan’s pharmaceutical standards.

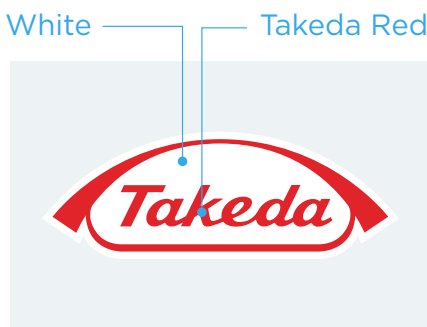

Core Elements and Usage

Dakiyama Corporate Logo

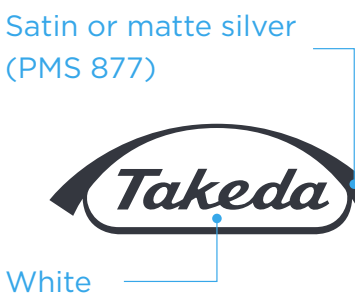

The guidelines for our corporate logo, the Dakiyama, apply to both internal and external use.

- The Dakiyama should be in the primary brand location on materials and positioned with prominence when possible
- Maintain the appropriate clear space
- The inside of the arch is always white and the logo always has a white outline
- No other descriptions, words or graphics can be attached to the logo (no lockups)

Color

Takeda Red:
CMYK 2.95.84.0
RGB 225.36.42
PMS 485 C
HEX #e1242a

Choose the appropriate color space (RGB/CMYK) version based on whether your design will be for digital or print use. Ensure that the inner part of the Dakiyama is white.

The Dakiyama always has a white outline.

Black and white

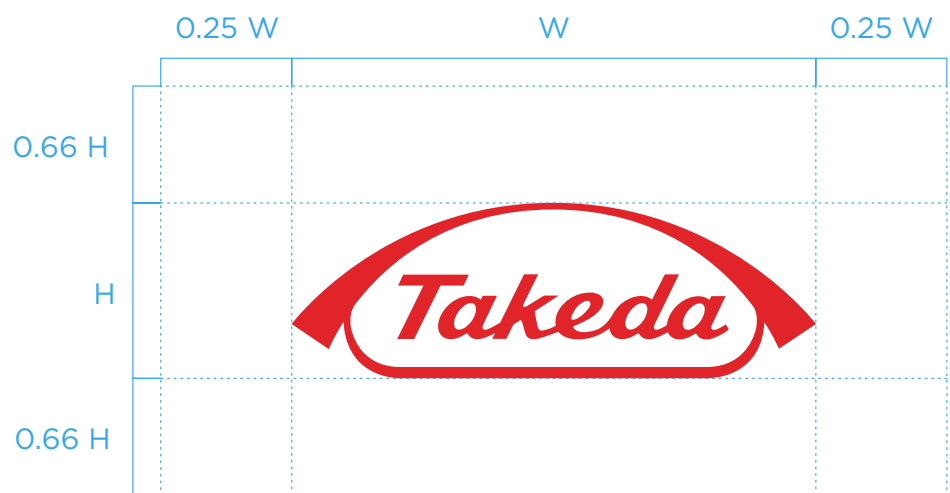

For use in situations where the red version is not suitable. The logo does not come in white (reversed) or transparent. The red parts become black with a white filled center and outline.

Silver

For corporate building signage and the company badge, the Dakiyama may be reproduced in satin or matte silver stainless steel. In these cases, a white outline is not required, although the center must be filled white.

Clear space

Clear space around our corporate logo (when not placed on an image) provides good visibility. The size of the clear space required is based on the width and height of the Dakiyama.

05 Focus Area Layouts

Links and Resources

Correct Usage

- Maintain the minimum space requirements around the logo
- Use the white-outlined version. This is especially important when placed on non-white backgrounds or photographs
- If placing on photographs, where possible, position the Dakiyama on a calm or neutral part of the photograph such as the sky or ground
- Contact Corporate Branding in case of doubt

Incorrect Usage

- Do not invert the colors of the Dakiyama
- Do not distort or change the logo shape in any way
- Do not add a shadow
- Do not allow background colors or photographs to show through the Dakiyama
- Do not allow other graphical elements to encroach upon the clear space
- On black, do not invert the colors

Core Elements and Usage

The Name "Takeda"

The “Takeda” name is the core of our corporate identity and should be used with care and restraint.

In the spirit of honoring our heritage, use of the “Takeda” name is reserved for the global, corporate, enterprise or organization level.

To protect our brand, increase our global brand equity and put forth a united global identity we are consistent in our use of the name "Takeda" or derivatives of it.

“Takeda + __fill in the blank__” or a derivative of Takeda including "TAK" should not be used in naming specific projects, initiatives, programs, functions, URLs, etc.

Usage of the company name in this way dilutes the corporate brand and detracts from the global efforts toward a consistent representation of the company. If permitted, there is a risk that the project, program, initiative, etc., could appear as a separate company/entity, or that it is representing something on a corporate, global level, and is inclusive of all activities/operations related to that project—when in fact it is most often representative of a country, region, or specific team.

Examples:

“Takeda Seminars”
“takedaseminars.com”

These could appear to represent all seminars hosted by Takeda globally, but would typically be requested for a niche use case, such as for health care professionals in a specific country, related to a specific disease only.

Instead of using “Takeda” in the name, the Takeda logo and name can appear in all materials to showcase the relationship and ownership of the project, initiative, function or website, etc.

Please refer to the “Endorsed Brands” guidance on [page 6](#) for further information.

Core Elements and Usage

Japanese Corporate Logotype

Corporate logotype usage

For digital or print materials that require the company name to be shown in Japanese as a design element, the corporate logotype master data (PNG/EPS) must be used. This helps ensure that it is always displayed in the correct typeface and color.

Please note that there is no English corporate logotype. For English, please type the company name using one of the corporate typefaces in one of Takeda’s corporate colors.

For regions/LOCs with non-Latin scripts, please contact the [Corporate Branding team](#).

Clear space

Clear space around our corporate logotype ensures good visibility. The size of the clear space required is based on the width and height of the logotype, and applies to both horizontal and vertical versions.

Minimum size

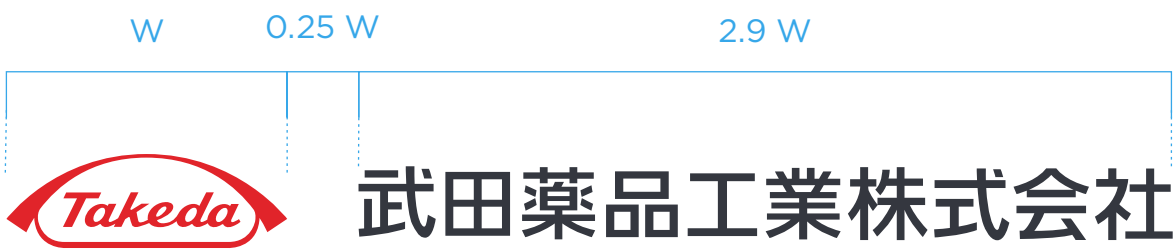

The minimum size must be maintained for both horizontal and vertical versions.

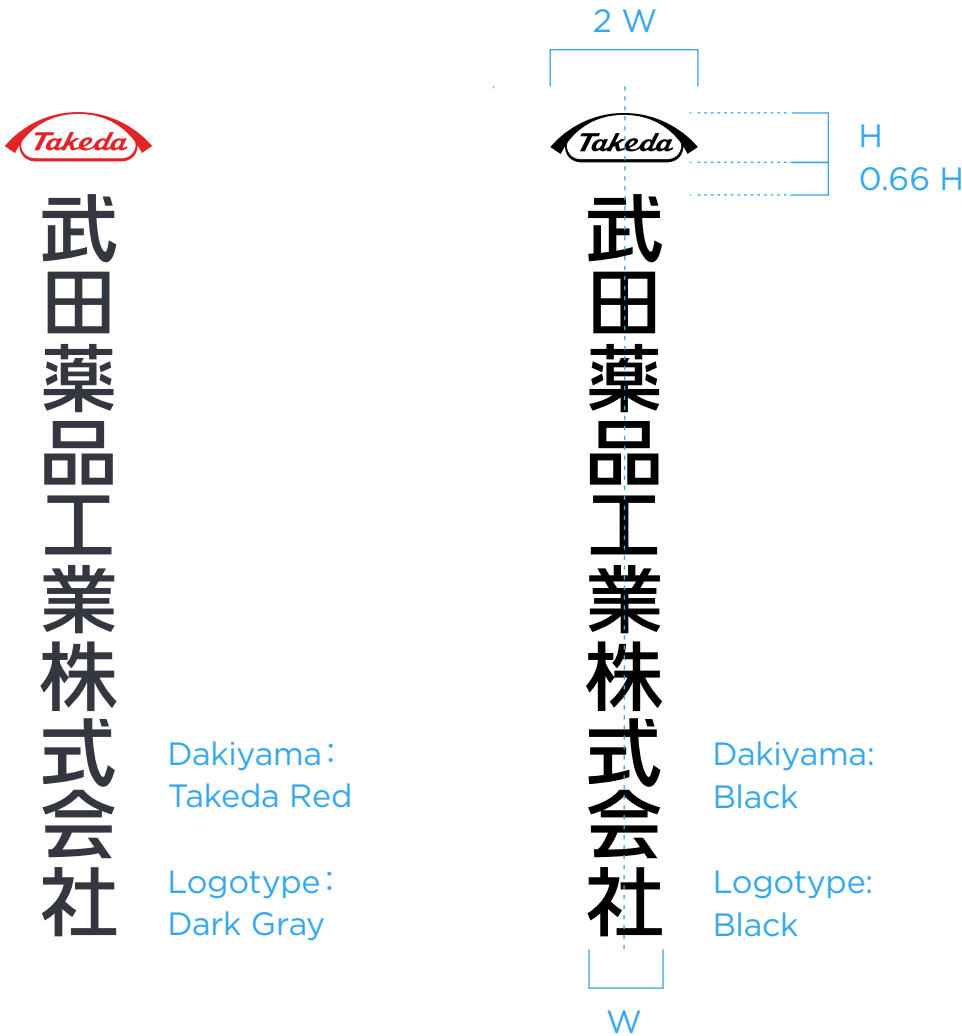

When shown in combination with the Dakiyama

Please use the original lock-up master data (PNG/EPS) for accurate representation when combining the logotype with the Dakiyama.

Horizontal lock-up

Vertical lock-up

Core Elements and Usage

Corporate Tagline

Our corporate tagline communicates an abbreviated version of our corporate purpose: Better health for people, brighter future for the world.

The tagline:

- The design file (PDF/PNG) should be used when possible
- Should be positioned prominently, but secondary to where the Dakiyama is positioned
- Should always remain in English and not be translated unless written in a body of text
- Must not be used in product or promotional materials, as it could imply an unsubstantiated quality-of-life claim

Other 'taglines' should be integrated into body copy. These include taglines such as "Empowering our People to Shine" or "We aspire to cure cancer".

One line

Better Health, Brighter Future

Two lines right-aligned

Better Health,
Brighter Future

Two lines left-aligned

Better Health,
Brighter Future

Usage Examples

The tagline can be used in a 'lock-up' layout with the Dakiyama, where it sits right at the edge of the bottom margin. In smaller applications, such as email banners, the tagline may extend beyond the width of the Dakiyama and can be left-aligned.

Standard

Small

Core Elements and Usage

Corporate Narrative

How to use the Corporate Narrative

- Draw inspiration from the core narrative as your North Star for tone and message; then adapt language by audience and channel
- Use the three narrative pillars to guide a range of content, such as presentations, campaigns and longer-form stories. Select and emphasize the pillar(s) most relevant to your objective
- Attach real examples of our values, behaviors and outcomes in action from your business unit
- Use the storytelling attributes to inform the style and tone of your communication and content

Storytelling attributes:

- **Generational Lens:** Put decision-making and innovation into long-term perspective of impact now and for generations to come
- **Human-Centric:** Elevate the people behind our stories; tell them through a human lens and show real-life impact
- **Promise-Focused:** Connect our deeply rooted values (our "generational promise") to our success
- **Convener:** Bring multiple voices with shared goals and interests together
- **Tech-Forward:** Showcase our embrace of advanced technology and behaviors that accelerate our capacity to win for patients

Our Corporate Narrative

Takeda leads with a generational promise to boldly reinvent for a healthier world.

We all want a healthier future. Takeda believes that achieving one requires bold reinvention grounded in long-term vision.

Takeda is unlocking a new era of impact, guided by a storied history of transformation and values-driven performance. We're delivering a pipeline of therapies that patients urgently need - and that we're uniquely capable of developing. We're embracing cutting-edge science, technology and partnerships to create new standards of care again and again. And we're deepening our commitment to succeed for patients.

This technology-forward, human-centric approach is expanding the difference we make for the patients and communities we serve - and fulfilling our promise to improve lives today while building a healthier world for generations.

• Headline

• A supporting story that includes what we believe the world needs, how we address it uniquely, and the aspirational outcome we seek

Core Elements and Usage

Corporate Typefaces for the Latin Alphabet

The designated typefaces are commercially available fonts selected for their clarity and visual harmony with our corporate brand. Select the most appropriate typeface for your purpose.

Please note:

- As a general rule, avoid using italics at small text sizes due to accessibility issues
- Aptos is usually available by default within Microsoft Office programs
- Open Sans is available at no cost online and can be installed by raising a ticket with AskIT
- Gotham requires an individual license that can be purchased as needed for design applications by agencies or employees
- Serif typefaces can be used when sans serif typefaces are deemed inappropriate for a given project (for example, invitations and official documents)

For Microsoft Word / PowerPoint / Excel

Core Elements and Usage

Corporate Colors

Primary Palette

Takeda Red CMYK 2.95.84.0 RGB 225.36.42 PMS 485 C HEX #e1242a	Azuki Maroon CMYK 28.100.96.34 RGB 137.21.21 PMS 1815 C HEX #891515	Dark Gray CMYK 76.64.51.56 RGB 52.55.63 PMS 447 C HEX #34373f
	Black CMYK 0.0.0.100 RGB 0.0.0 HEX #000000	Heron Blue CMYK 22.12.0.16 RGB 161.177.196 PMS 651 C HEX #a1b1c4
	White CMYK 0.0.0.0 RGB 255.255.255 HEX #ffffff	Light Gray CMYK 9.3.4.0 RGB 237.242.244 PMS 656 C HEX #edf2f4

Among the corporate colors, the main color, Takeda Red, is the most important for symbolizing Takeda. It is used in the Dakiyama corporate logo, the Takeda Curve and is the primary color in Takeda’s gradients.

For printed packaging material, please refer to the [Global Artwork printed packaging artwork guidelines](#)

→ [myTakeda](#)

Tints

Light Heron Blue CMYK 7.4.0.12 RGB 209.216.224 HEX #d1d8e0	Light Pink CMYK 0.56.38.0 RGB 247.140.133 HEX #f78c85	Dark Red CMYK 18.100.100.9 RGB 189.18.10 HEX #bd120a	Dark Maroon CMYK 45.86.77.70 RGB 69.10.10 HEX #450a0a
--	---	--	---

Four tints (colors that are lighter or darker versions of Heron Blue, Takeda Red and Azuki Maroon) can be used when the primary palette alone does not provide enough colors for your design. Usage of these tints is typically found in charts, graphs and informational graphics in corporate presentations.

Additional colors

The historical secondary color palette, originating from Takeda’s pre-2017 brand, no longer fully aligns with Takeda’s modern brand expression.

For digital products such as websites and digital applications, where broader color systems are often needed, teams should refer to the TORO Design System, which provides a set of global system colors designed for functional and semantic use.

See [page 24](#) for more information on the TORO Design System.

Core Elements and Usage

Corporate Colors

Color Combinations

Takeda’s color palette preserves the roots and recognition of Takeda Red while incorporating Black, White, Azuki Maroon, Heron Blue, plus Light Gray and Dark Gray.

External materials should reflect and portray clear simplicity, using few colors. Additional colors from the palette can be added as required, such as for graphs and charts, while colors included in the TORO Design System can be used for digital applications and websites.

Dominant colors should be White and Dark Gray, with additional colors used more sparingly. While Takeda Red is our main color, when it comes to text, it should be used sparingly as a highlight color for the most important information.

Azuki Maroon is used as an accent color, most commonly for charts or sub-headings where red is not appropriate.

Fewer colors

More colors

• Corporate Ads

• Corporate Websites

• Social Media

• Business Cards

• Envelopes

• Letterhead

• Email Signatures

• Factsheets

• Brochures

• Powerpoint Presentation Content (graphs, charts, text box, etc.)

This simple palette is dominated by white and Takeda Red, is ideal for touch points that require high visibility and attention such as corporate and house advertisements, factsheets and videos.

This expanded palette is used within secondary/supporting communications where the primary color palette does not suffice. For example, charts, graphs, statistics, histograms, etc.

Corporate Colors

Gradients

The gradient system is dynamic and allows for different color-stop combinations, while maintaining Takeda Red as the primary color, with hints of Azuki Maroon, Heron Blue, Light Gray and White.

Recommended uses

Use gradients in high-visibility moments where the brand needs energy, emotion, or memorability:

- Homepage hero banners
- Cover slides/title pages
- Statistics/quote callouts
- Event visuals
- Social media post backgrounds
- Icons

A series of pre-made gradient images is available on the Corporate Brand portal

Gradient Reproduction

Default

By default, the gradient is constructed using four color stops placed at each corner of the artboard, with Takeda Red positioned at the top and Heron Blue and Azuki Maroon positioned at the bottom.

Complex

The gradient system also allows for more complex compositions to create a more dynamic feel, where the position of the color stops can be adjusted freely, provided there is adequate spacing between them to avoid banding.

Core Elements and Usage

Corporate Colors

Gradient Best Practices

Gradients add richness and vibrancy to our visual language, but they must be used with care and intention. Ensure print assets are properly produced to avoid color banding. When placing text over gradients, always maintain strong contrast for legibility and accessibility.

✔ Correct Usage

- Adequate contrast/legibility when used as text background
- Takeda Red as the dominant color
- Dominant usage in layouts for covers/section openers
- Used sparingly for other content pages, e.g. highlighting key statistics

Takeda Red should remain the dominant color, with Heron Blue and Azuki Maroon used as accents. Avoid gradients that become too light, particularly in print or small elements, as this can appear inconsistent or misprinted. Where necessary, use a more limited gradient range to maintain visual clarity and quality.

✗ Incorrect Usage

- Poor contrast/legibility when used as text background
- Colors other than Takeda Red as the dominant color
- Multiple gradients competing for attention
- Color stops placed too close together, causing color banding
- Unintended white spots appearing in the gradient

Links and Resources

The Takeda Curve is a design element based on the Dakiyama that emphasizes the most important element within a layout.

Usage of the Takeda Curve

When used to highlight text, only one Takeda Curve should ordinarily be used per layout or page. The curve should always appear in Takeda Red or white.

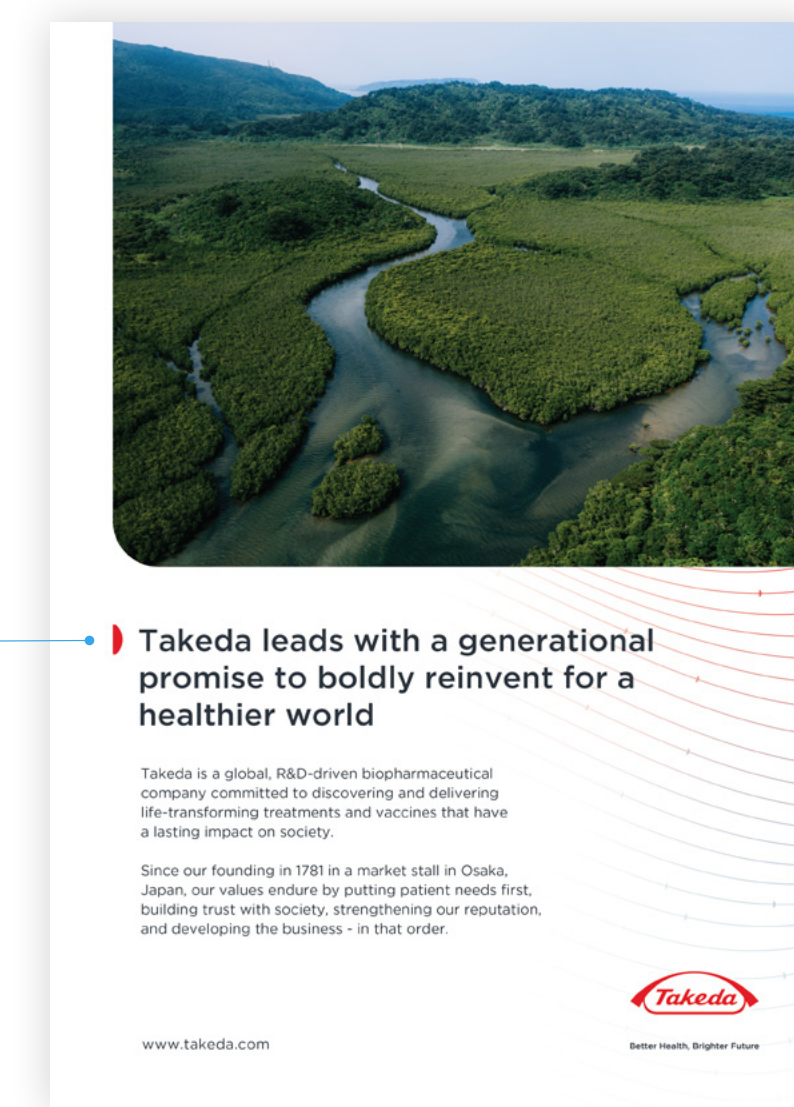

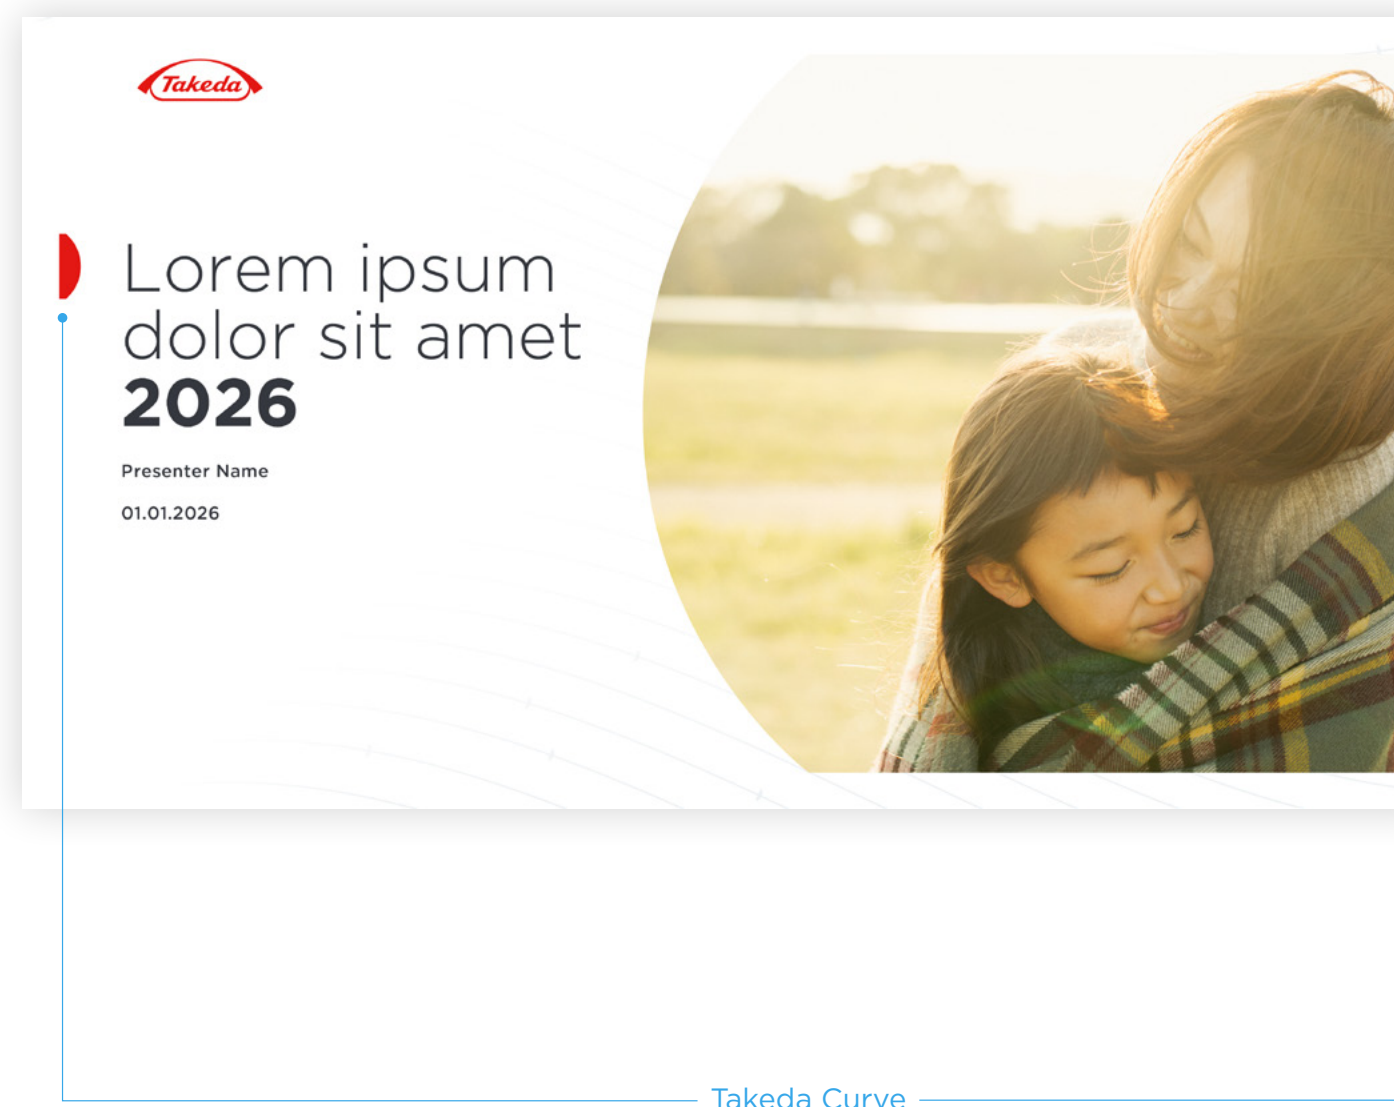

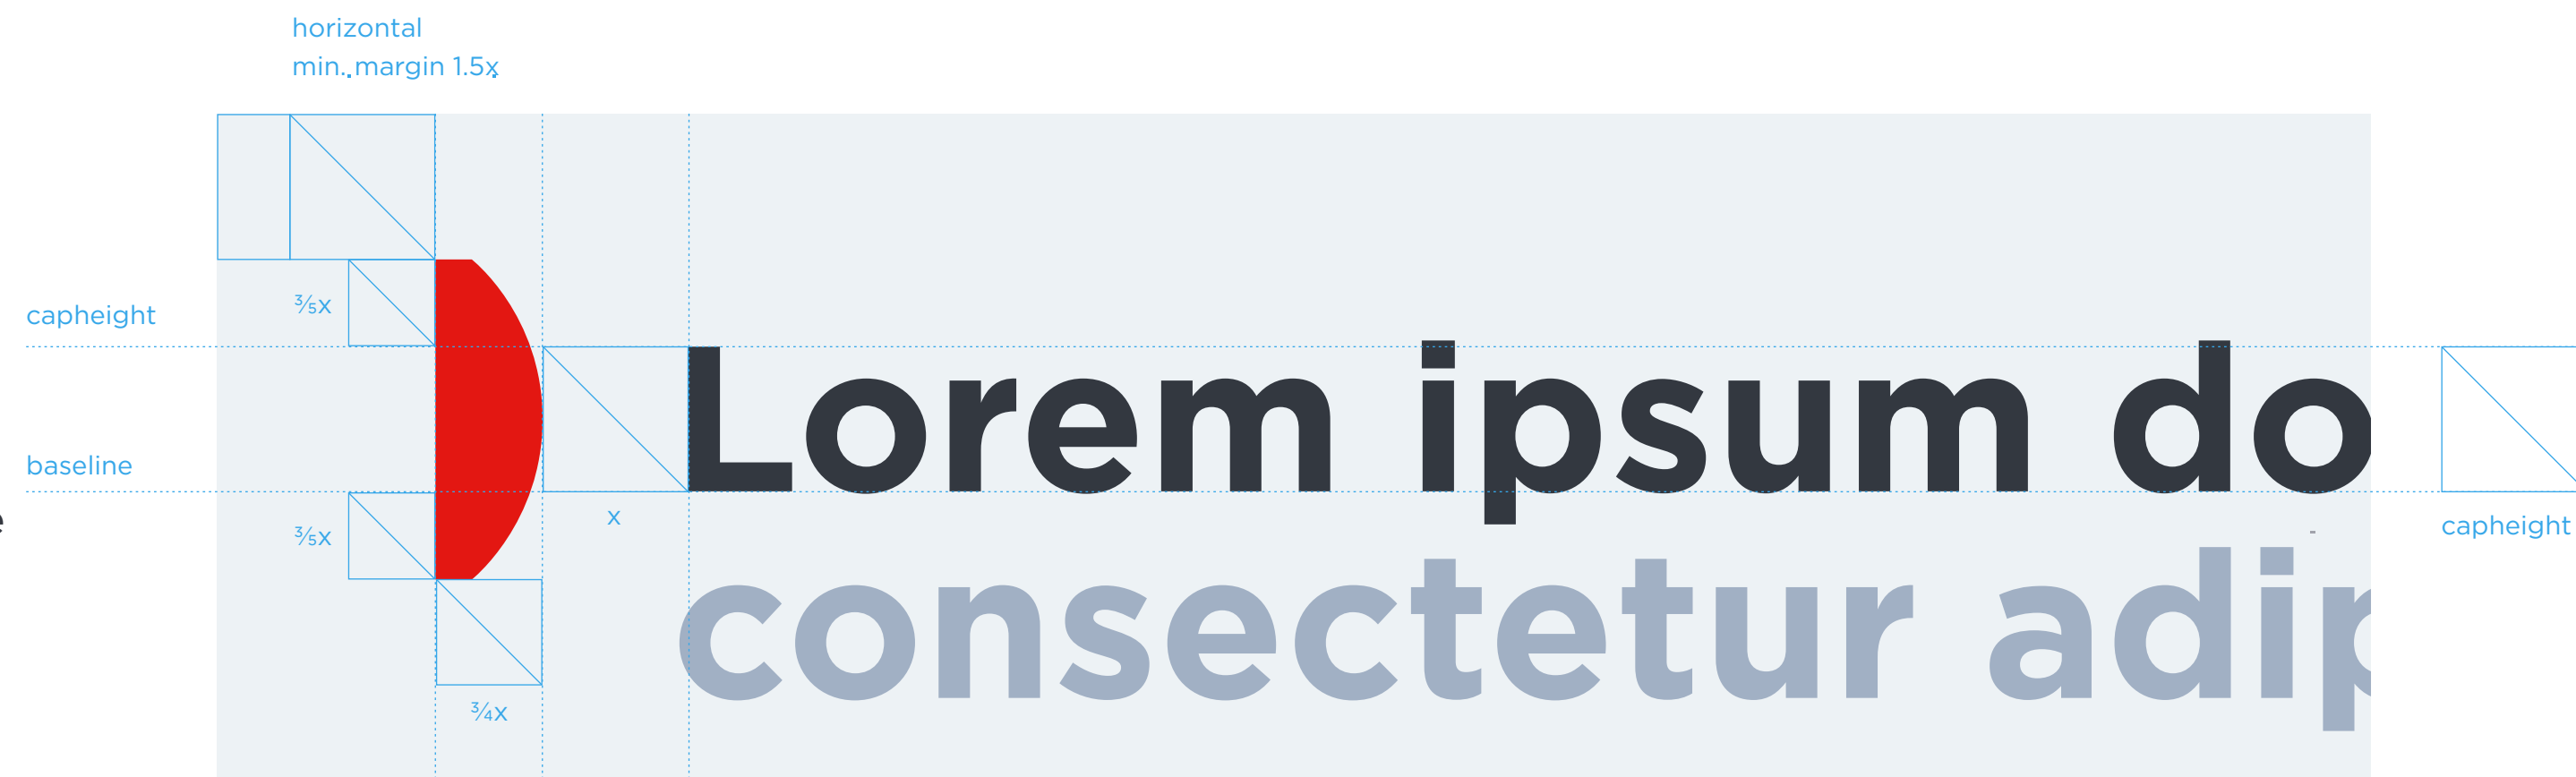

For single-line text blocks, the Takeda Curve should extend an equal distance above and below the text, with the curve vertically centered on the text block.

In certain cases, such as PowerPoint™ slides with titles that span two lines, the Takeda Curve may be vertically centered on the two-line text block.

For text blocks spanning three or more lines, align the Takeda Curve with the first line of text.

Links and Resources

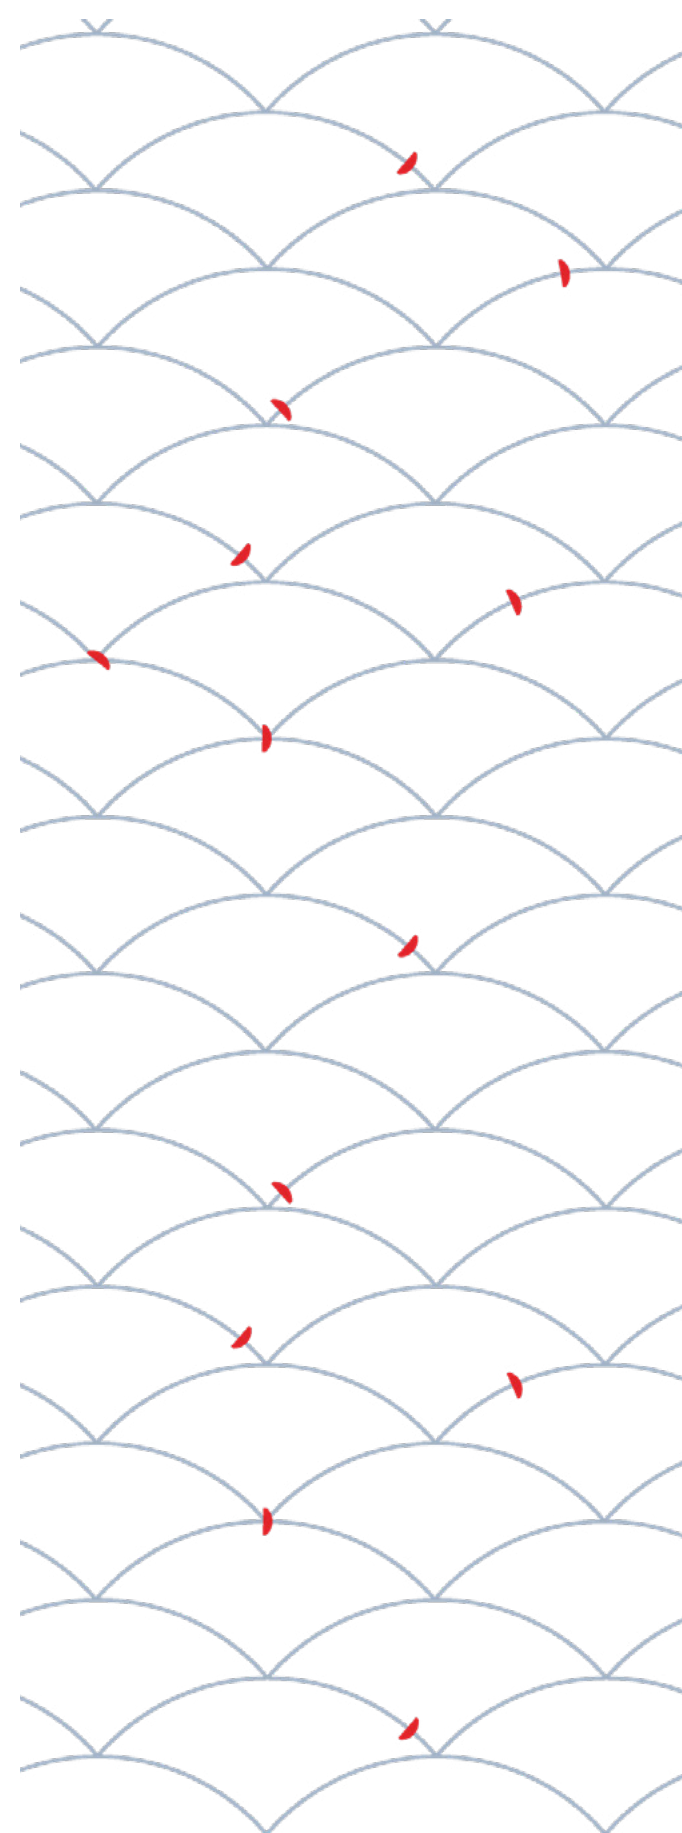

To support a more flexible and expressive brand, a series of patterns has been introduced as a subtle but distinctive layer within the Takeda visual system. Designed to work across a range of applications, these patterns can be used with restraint as a background detail or more prominently to create visual impact, depending on the context.

Available in multiple color variations, they integrate seamlessly with the Takeda palette and bring added depth and interest beyond flat color. While each pattern is informed by a sense of movement and direction, the patterns remain simple and controlled, ensuring consistency while allowing for creative flexibility across touchpoints.

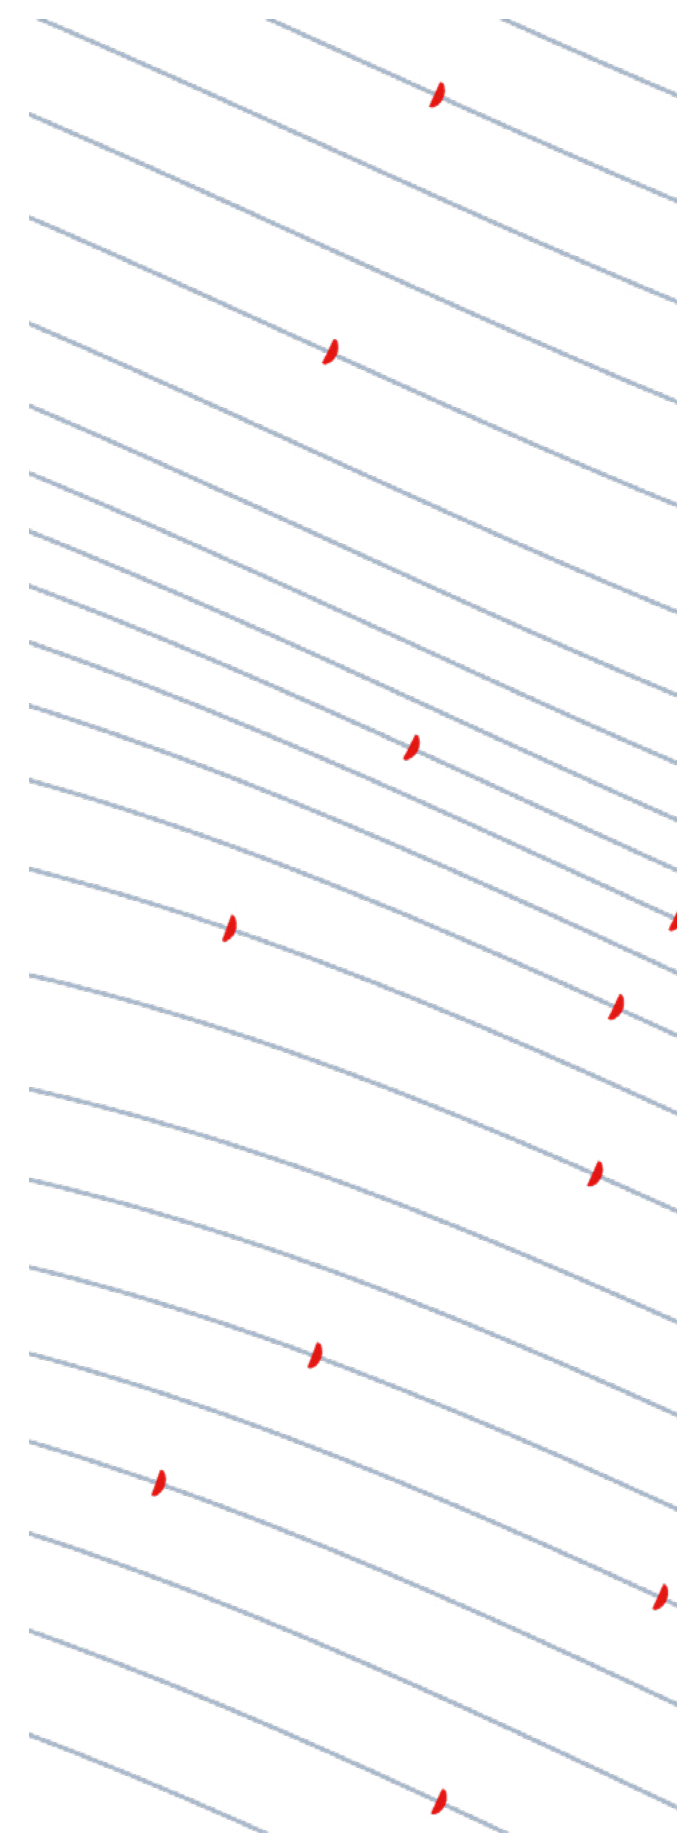

A series of pre-made patterns is available on the Corporate Brand portal

Links and Resources

Each of the four distinct patterns is available in four different states. These range from subtle, minimal applications to full-color treatments where the pattern becomes a more prominent visual element.

Incorrect usage

- Do not overuse patterns or apply them throughout an entire layout.
- Do not place patterns behind body copy or other text-heavy content.
- Do not use darker pattern applications as backgrounds for text or complex graphics.

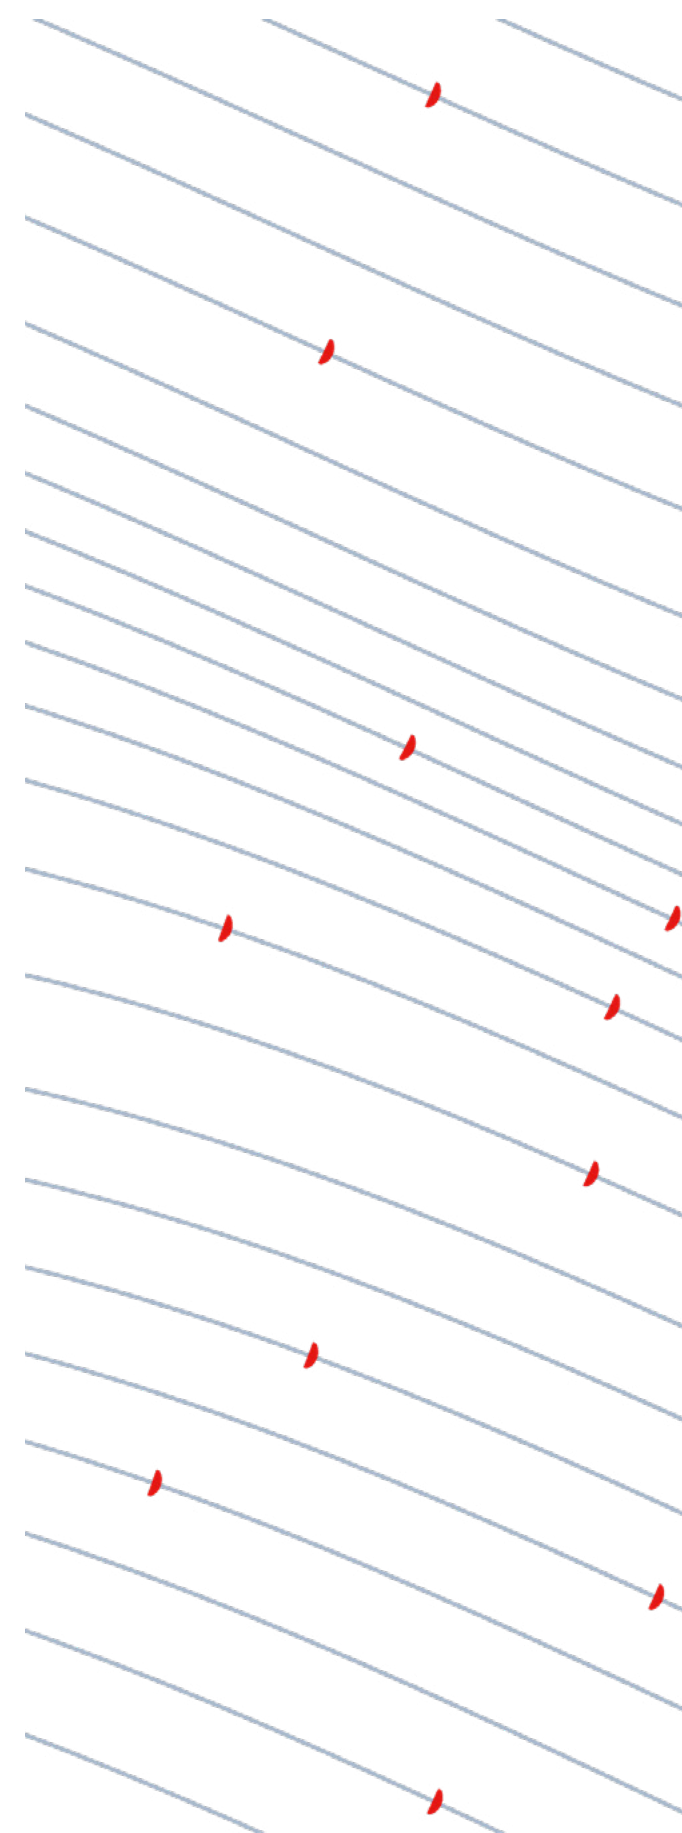

Pattern generators

A range of pattern variations is available for download from the Corporate Brand portal. In addition, a simple tool is available to create custom variations, allowing you to adjust scale and composition to suit different applications.

Core Elements and Usage

Motion Behavior

Takeda’s motion principle is designed to communicate through motion graphics with confidence and care. Our motion language prioritizes precision, clarity and continuity.

Precision

Motion should feel intentional, controlled and exact. Every movement must appear purposeful rather than expressive or improvised.

Clarity

Motion should simplify understanding and guide attention naturally. It exists to organize information and establish hierarchy.

Continuity

Motion should feel connected, fluid, and uninterrupted. Transitions should preserve a sense of progression rather than fragmentation.

⊗ Motion behaviors to avoid

Avoid motion that feels **playful, aggressive, disruptive, overly energetic**, or **trend-driven**. To support this, avoid implementing motion behaviors such as **bounce, elastic movement, squash and stretch** or **exaggerated easing**.

Examples are available to view in the [Takeda Global Media Library](#)

Photography often sets the fundamental tone of our design work. The choice of photography should reflect the essence of our brand, and should feel authentic, energetic and positive.

Pay close attention to ensure photography choices:

- Have a clear point of focus
- Are well lit and have natural lighting
- Show energy, diversity, caring and warmth
- Depict authentic scenes and are not heavily edited
- Are not overly artistic or look unrealistic
- Do not have lens flares or a filtered/moody look
- Do include brand colors in clothing or props to help connect images to the brand (optional). It is permitted to change colors in the post-production process.

Our [Global Media Library](#) is a valuable resource for pre-approved Takeda original imagery, stock photography, and Takeda original B-roll footage. The use of Takeda original photography should be prioritized over stock photography whenever possible.

PowerPoint™ Slides

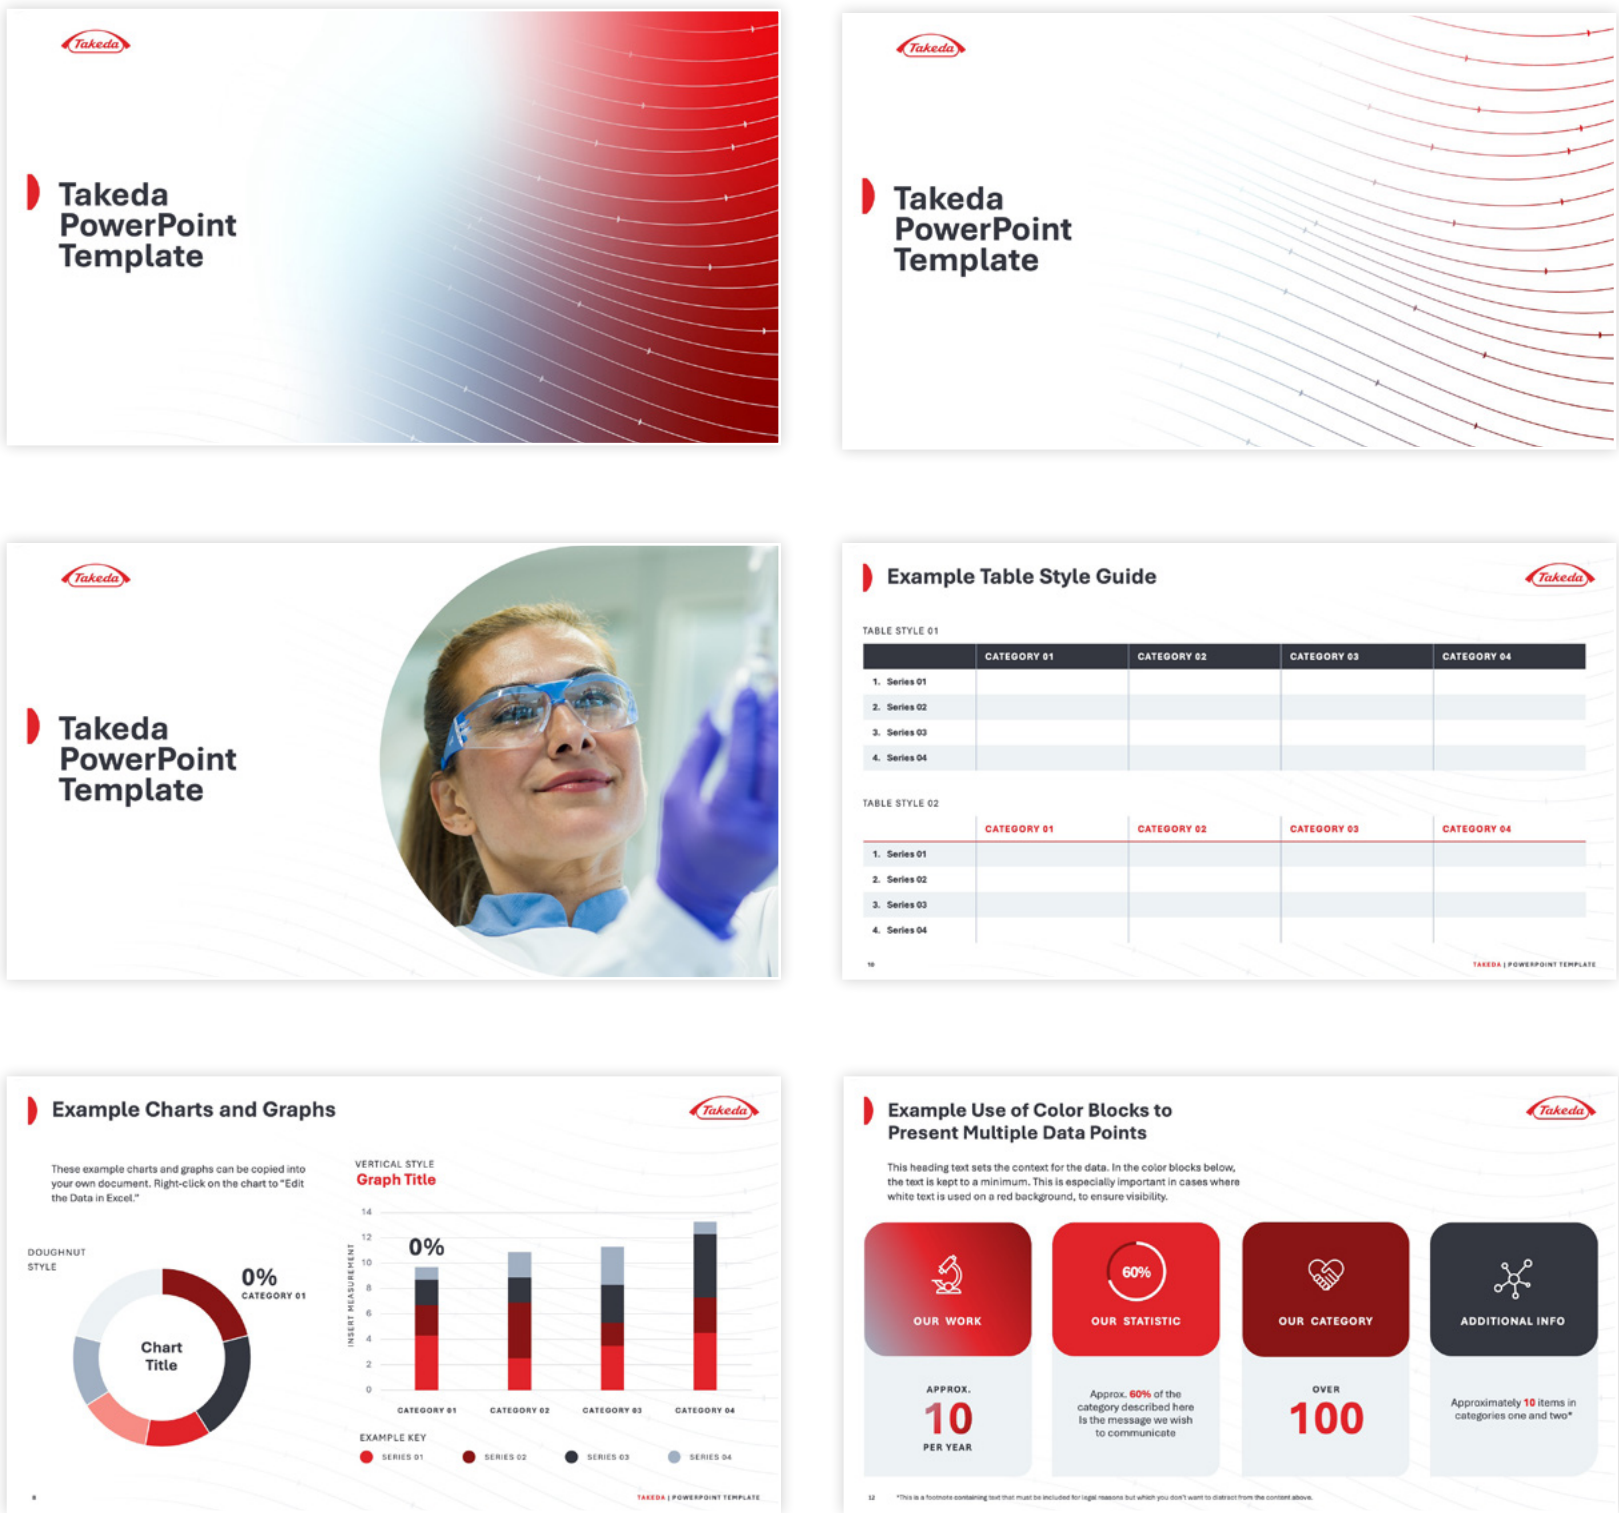

Our corporate PowerPoint template provides a wide variety of slide options for the quick and easy creation of on-brand, sophisticated presentations.

From simple text-only slides to those featuring several charts, the template contains multiple layouts that can be customized to meet individual needs.

The template also contains example charts and tables that can be copied and updated as needed, in addition to drag-and-drop image placeholders that automatically apply Dakiyama-inspired curved corners.

Please note that if your presentation is for product or promotional use, your slides must not include the corporate tagline, as this could imply an unsubstantiated quality-of-life claim.

The main template is automatically deployed to all Takeda PCs. If not pre-installed, it can also be downloaded from [myTakeda](#).

Download PowerPoint templates from myTakeda

→ [myTakeda](#)

Tools and Templates

Business Cards

All business cards should follow the corporate template. Business cards feature the Dakiyama on the left, centered in a white space, with all of the text on the right.

The details will vary depending on your local legal entity and HR policies—there are no global requirements. Please consult your HR department for more details.

The back of the card is intentionally blank for use in dual-language regions where the design is repeated in an alternate language. We do not deviate from the set design, and additions to the card, including headshots, QR codes, personal social media details and additional logos etc. are not permitted. To discuss exceptions to the above, please contact the [Corporate Branding team](#).

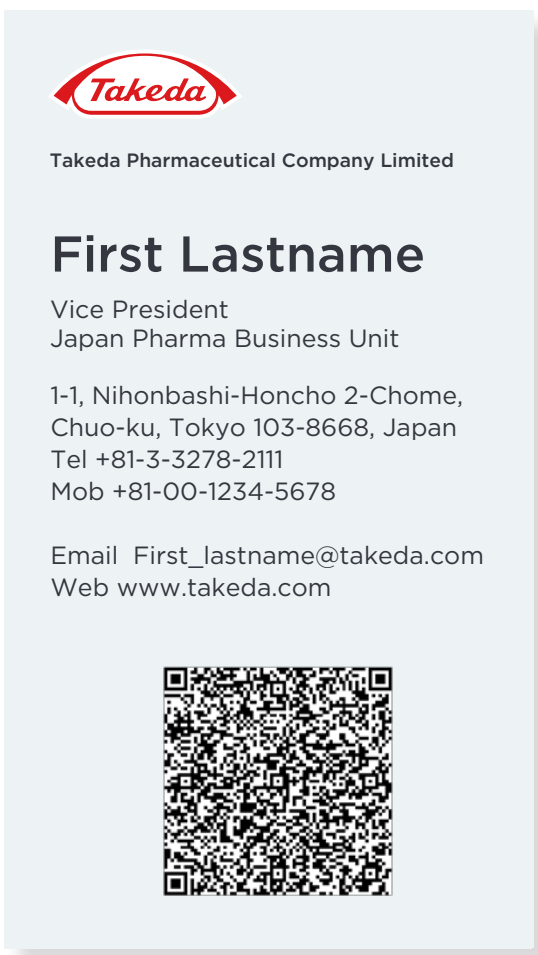

Digital business/contact cards

A digital business/contact card is permitted. The digital contact card can be your Takeda contact information or personal information depending on how you want to use it. Digital business cards should follow the brand principles to the extent that the card creation tool being used allows.

The business card template is available for download from [myTakeda \(English only\)](#)

The Branding team has a collection of pre-approved adverts for use in sponsorships, conferences, award submissions, etc.

In cases where the size of the ad requires adjusting to meet your specific requirements, please email the specifications and your choice of design to corporate_branding@takeda.com at least 7 working days before your deadline.

Information to submit to Corporate Branding when requesting ad resizing:

- Your choice of ad to be resized
- Size of the ad, including height/width, bleeds, trim and live area
- Color or gray-scale (black & white)
- File format publication requirements (a high-resolution PDF will be the default file provided if none is specified)
- Appropriate company name if it differs from 'Takeda Pharmaceutical Company Limited.'
- Deadline for materials

Takeda leads with a generational promise to boldly reinvent for a healthier world

Takeda is a global, R&D-driven biopharmaceutical company committed to discovering and delivering life-transforming treatments and vaccines that have a lasting impact on society.

Since our founding in 1781 in a market stall in Osaka, Japan, our values endure by putting patient needs first, building trust with society, strengthening our reputation, and developing the business - in that order.

Brand Elements in Videos

The Dakiyama should be displayed at the end of all external videos, and is recommended, although not mandatory, for internal videos.

The Dakiyama should not be animated other than a simple fade in and/or a small zoom in/out.

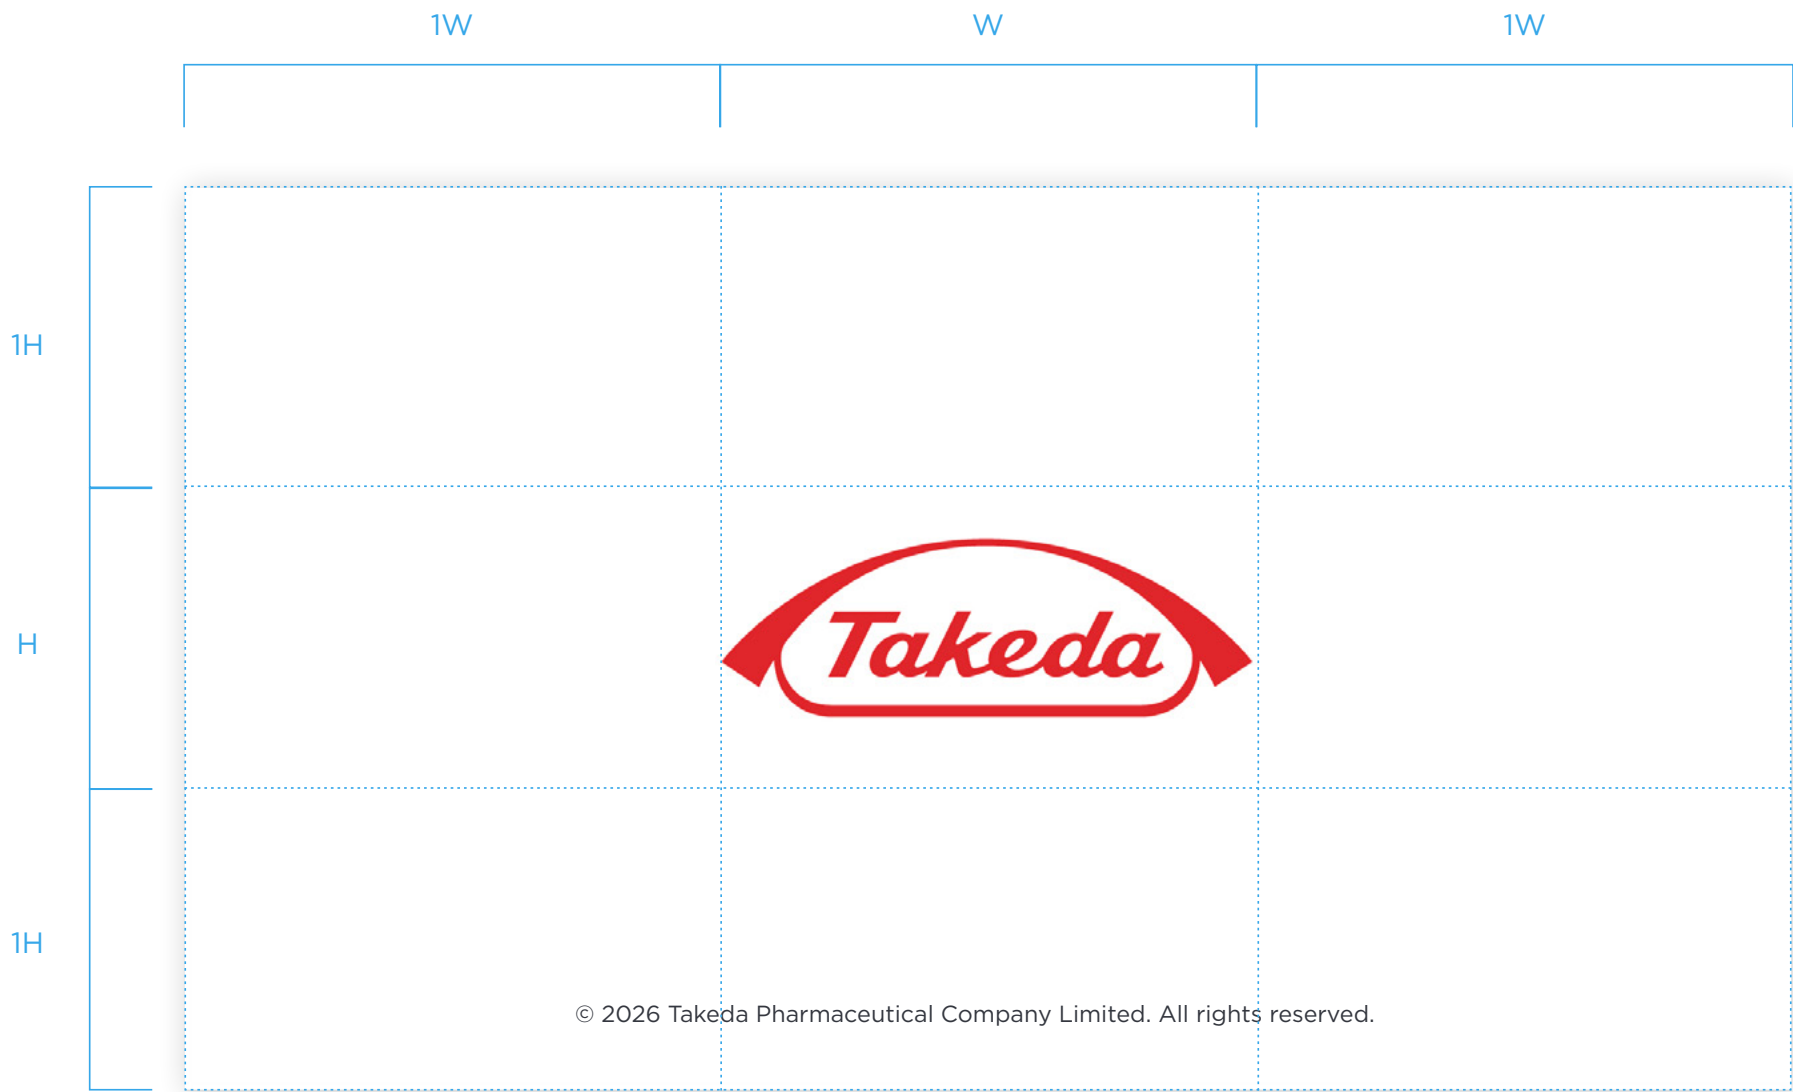

If desired, the corporate tagline can be used in addition, either appearing below the Dakiyama (separated by the required clear space) or shown before the logo appears.

All videos should display appropriate copyright and legal "end matter". Please consult your local legal team as needed.

An approved mp4 template is available for download.

Lower thirds title graphics should follow the general principles of design as shown in section 2 of these guidelines. Sample lower thirds templates are available for download.

Captions/subtitles are required: please see the following page.

The logo can be displayed at up to 33% of the width of the frame

Examples of on-brand lower thirds graphics

Links and Resources

For improved accessibility and the indexing of videos in search engines, all videos should include subtitle/caption files.

Takeda.com

Videos to be embedded on Takeda.com require subtitles in a .VTT file. Please refer to [myTakeda](#) for information on creating VTT files.

YouTube

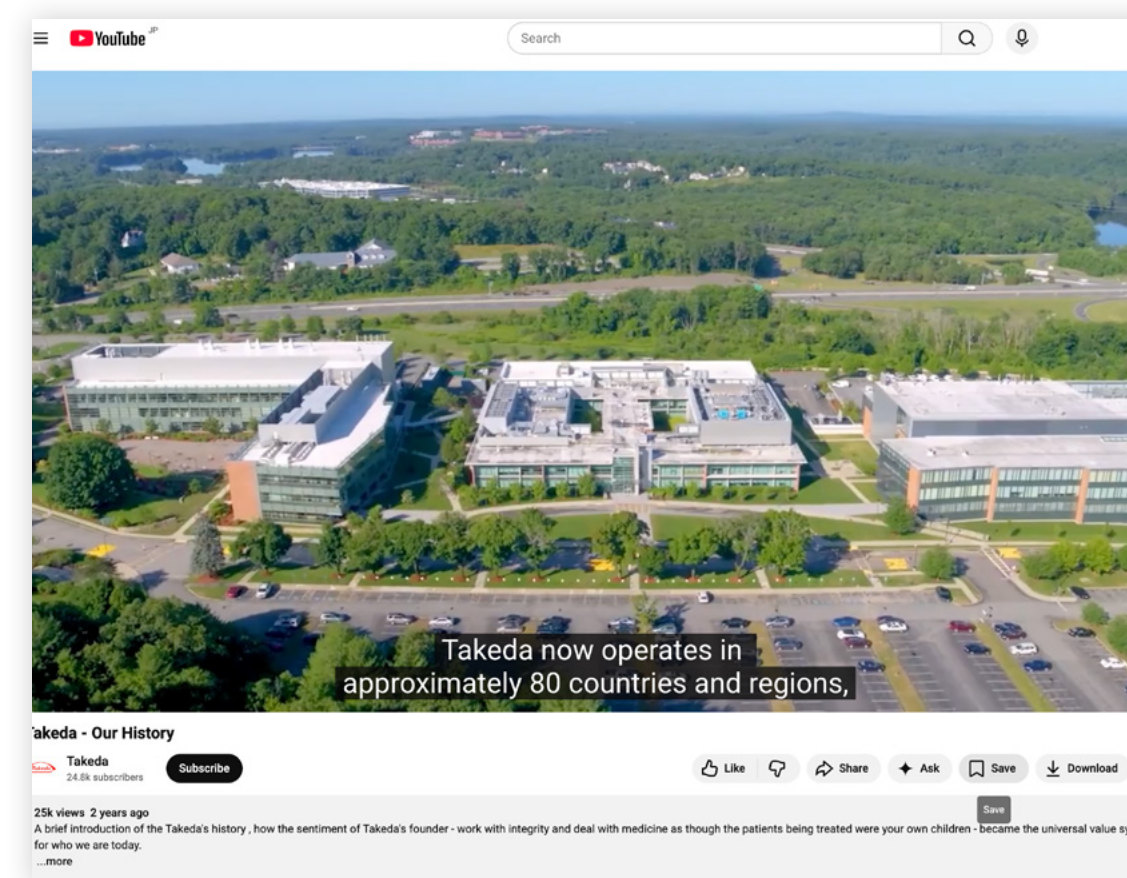

Videos to be uploaded to the corporate YouTube channel should be accompanied by Closed Captions in the industry-standard .SRT or .VTT file formats. YouTube video titles, descriptions and captions all support multiple languages allowing one video to be used for multiple audiences.

LinkedIn

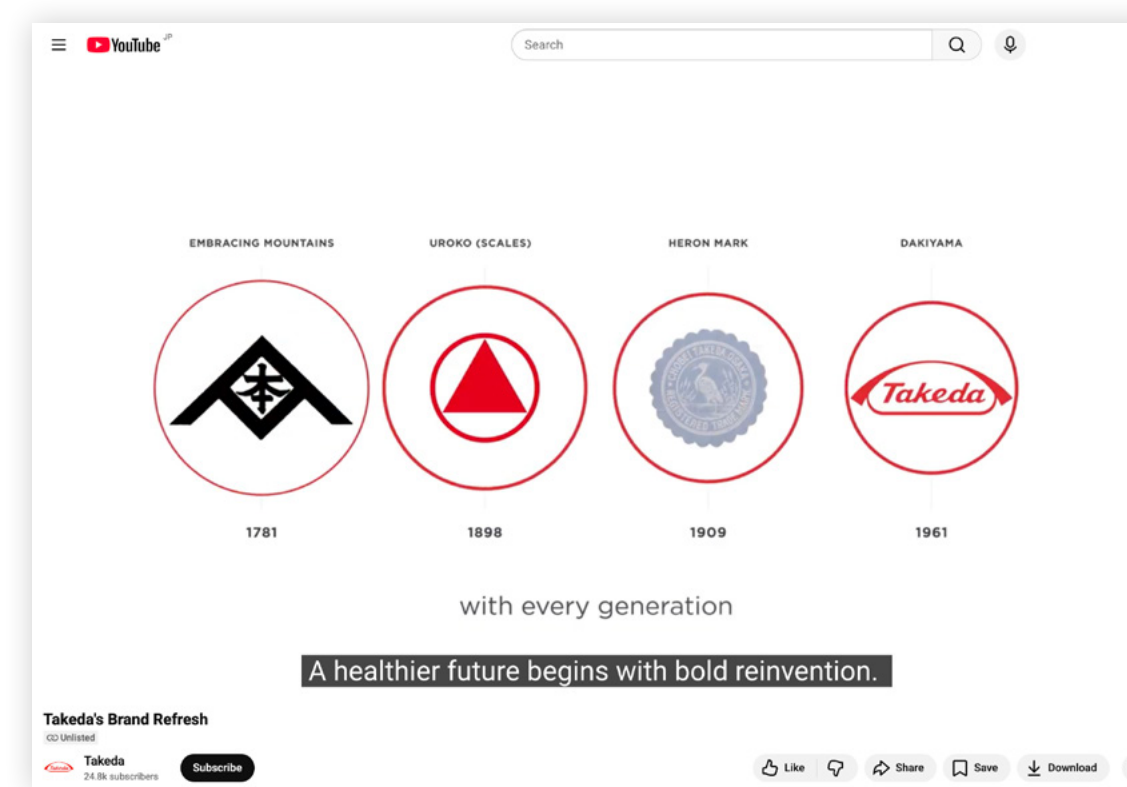

As of the time of publication, Khoros, the platform Takeda uses for uploading content to LinkedIn, does not support closed caption files for LinkedIn. Instead, we recommend using "burned in" open captions on video content for users who consume LinkedIn content without audio.

Captions/Subtitles best practice

→ [myTakeda](#)

YouTube videos support multiple language caption tracks allowing the user to select their preferred language.

Videos without narration but with text on screen also require a closed caption file.

Corporate-branded giveaway items such as T-shirts, notebooks, pens, bags, hats and other items can be created using the Dakiyama.

Please ensure

- The logo is the correct color, has a white outline and is filled with white
- The tagline should not be used on small items on which it cannot be printed clearly
- Additional function/team/department/project/initiative names can be added in a secondary brand location on an item, away from the Dakiyama

Please design and order through your locally approved promotional material vendors in accordance with relevant procurement and local reporting requirements.

For brand review and confirmation prior to ordering, please contact the [Corporate Branding team](#).

For the best branding outcomes, choose promotional collateral in one of our [corporate colors](#) (ideally white, light gray, red, or black).

04

Digital

- A. Domain Names
- B. Websites
- C. Social Media Channels

Digital

Domain Names

Website domain names or URLs should not contain the Takeda company name (or derivative of the name); this is only allowed for LOC corporate website subdomains.

This restriction is in place to ensure global protection of the Takeda name and brand, and to prevent a site from appearing to represent a separate company.

Registrations of domains containing the company name are only permitted for brand protection purposes; they cannot be used publicly, as a vanity URL, or built on.

Global IT manages a central global domain registration process; please submit a ticket through AskIT. When submitting a domain (URL), please note that this should follow the guidance on use of the Takeda name ([page 12](#)).

Short links/Bit.ly

Use of "Takeda" is allowed through the use of a short link, Bit.ly. This can be used in marketing materials, social posts, etc.

Please submit a request to Global IT to have a Bit.ly created.

The corporate Bit.ly naming convention is "takeda.info/requested-name"

Bit.ly links can be requested at

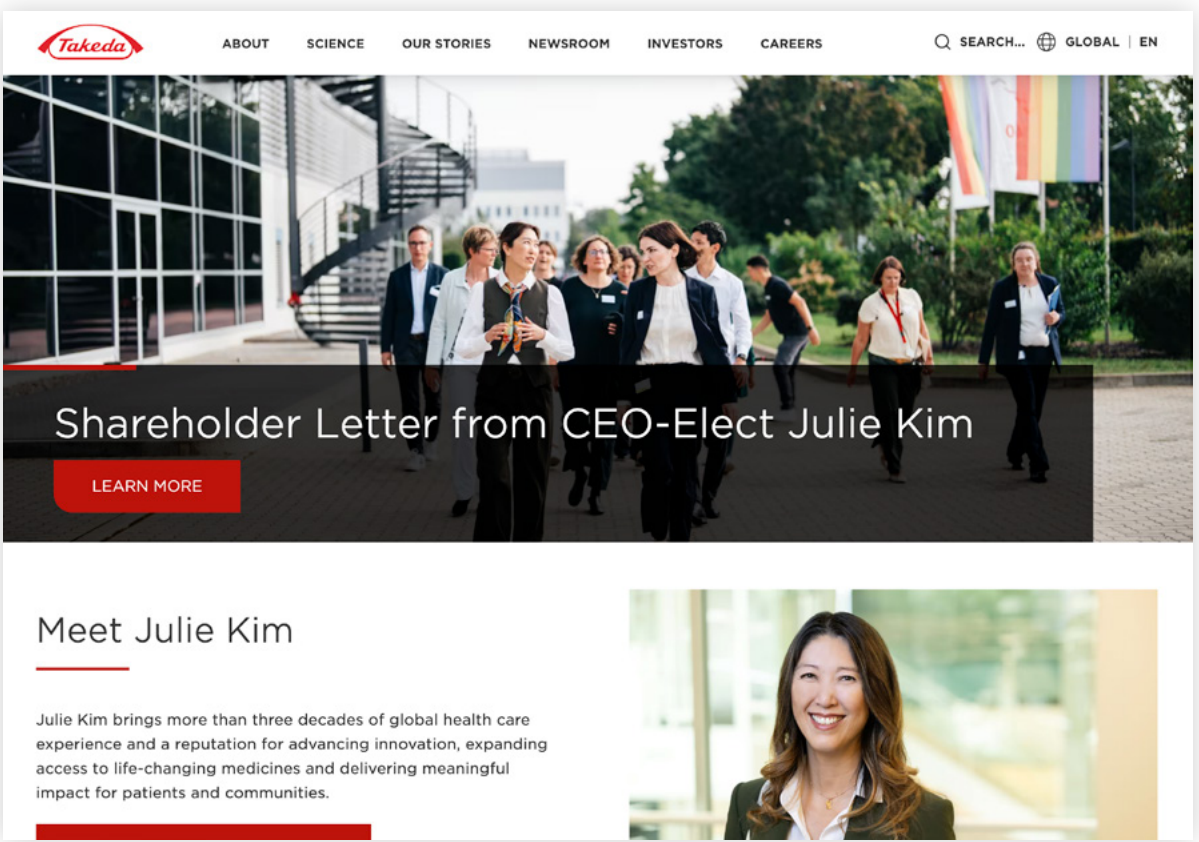

→ <https://takeda.info/bitly>

Digital Websites

The brand guidelines do not just apply to slides, print materials, brochures, letterheads, and templates. They also apply to all of our digital properties, websites, and social channels across regions/LOCs, products, disease awareness, patient support campaigns, etc.

The brand guidelines and additional digital governance, design, and content guidance applies to the corporate site, region/LOC websites, commercially funded product, disease awareness, patient services sites and SaaS.

Digital Social Media Channel Development and Corporate Content

Social media channel development and content needs to be undertaken with knowledge and professionalism. To guarantee success, we must ensure we are approaching new channels and content within global guidance and regulatory and legal compliance.

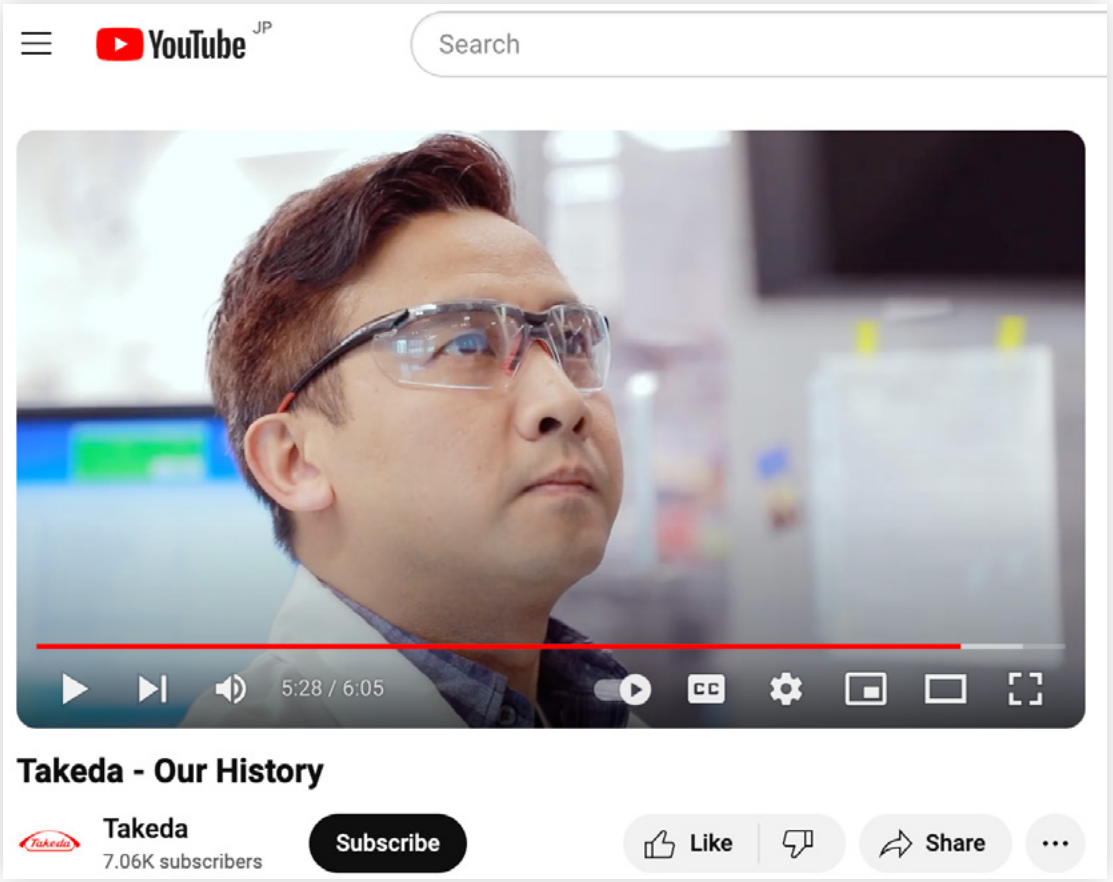

To protect our people and the Takeda brand, we have policies, governance and training available to inform your use of social media.

We also have a range of Global Corporate Social Media Templates and guidance documents available to download for internal and agency use.

All resources can be found on the [Social Media](#) page of myTakeda.

Focus Area Layouts

- A. Introduction
- B. Usage Rules
- C. Improper Usage

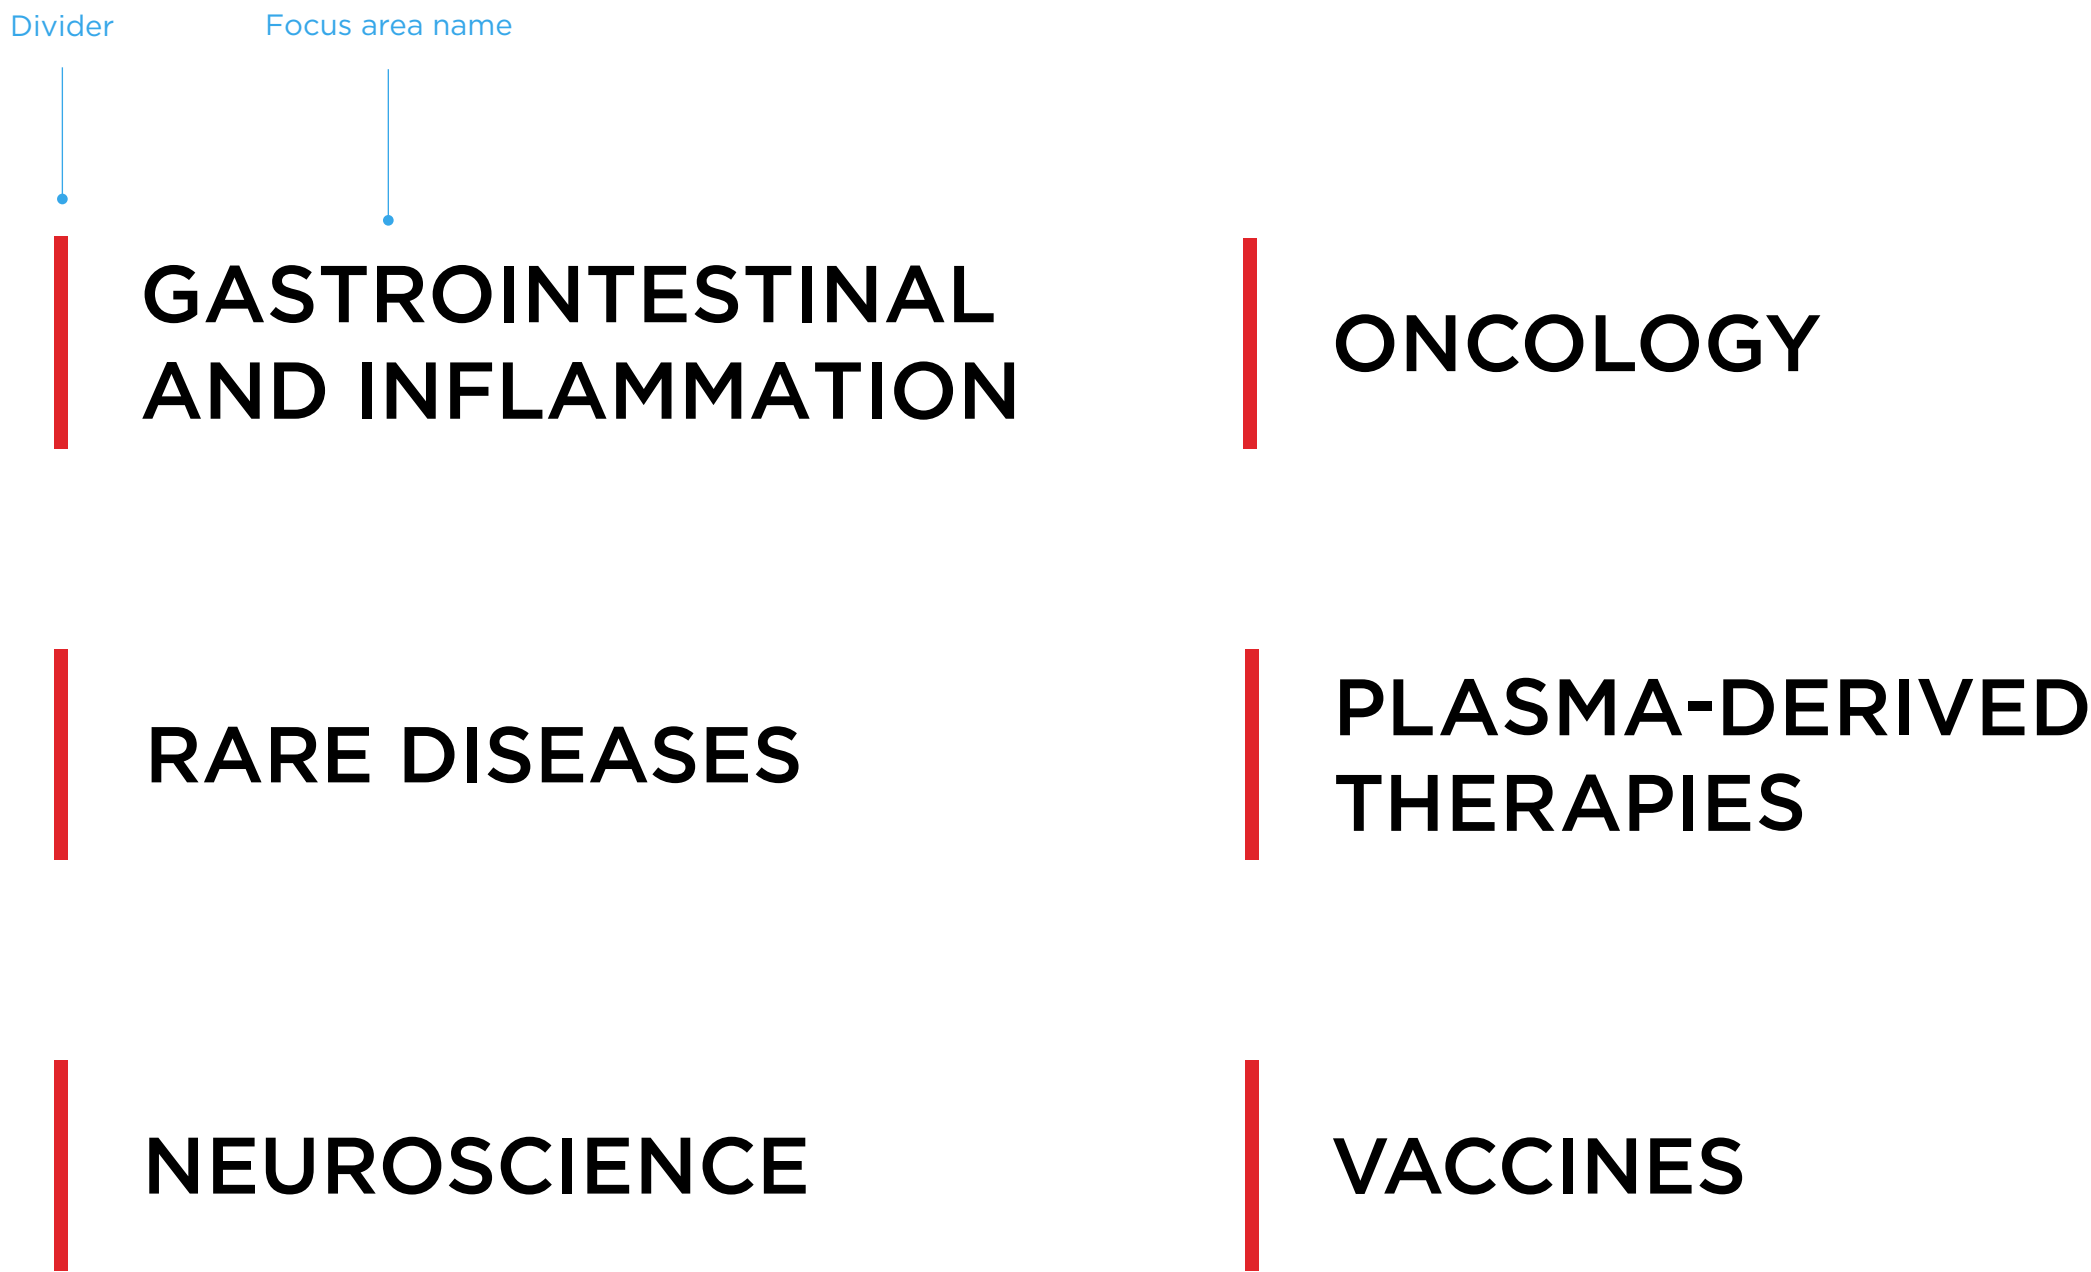

Focus Area Layouts

Introduction

Takeda should only be represented by the corporate logo, the Dakiyama. If there is a significant need for an audience to recognize that a material’s content relates specifically to one of the six focus areas, the following layouts may be used.

These layouts are not logos to be used to represent the focus areas as their own brands, but approved arrangements to be used for specific content distinctions.

While these layouts could be interpreted as logos, it is important to understand that they are not logos in themselves. They are simply approved arrangements of the focus area name, the Divider and the Dakiyama.

Focus Area Layouts

Usage Rules

There are strict rules regarding when and where these combinations can be used:

1. Are your materials representing Takeda as a company overall?

- If yes, then please use corporate templates and the Dakiyama alone
- If no, then you can consider using the Focus Area Layout on: PowerPoint, posters, etc.

2. It must be clear from the content or context that your content is only representing a particular focus area.

These rules are based upon the context of your use:

- PowerPoint presentations
- Posters
- Print ads
- Brochures

Examples where Focus Area Layouts are not permitted

These materials are “corporate” materials that represent the global organization and should not be used to distinguish a specific therapeutic area.

- Business cards
- Letterheads
- Email signatures
- Envelopes
- Videos
- Websites
- Social media post images or hashtags
- Social account icons
- Collateral/Giveaway materials (e.g. pens, jackets)
- Exhibition booths
- Product Packaging and materials

Focus Area Layout files and usage examples are available on myTakeda

→ [myTakeda](#)

Focus Area Layouts

Improper Usage

Do not change the layout shape or component positions

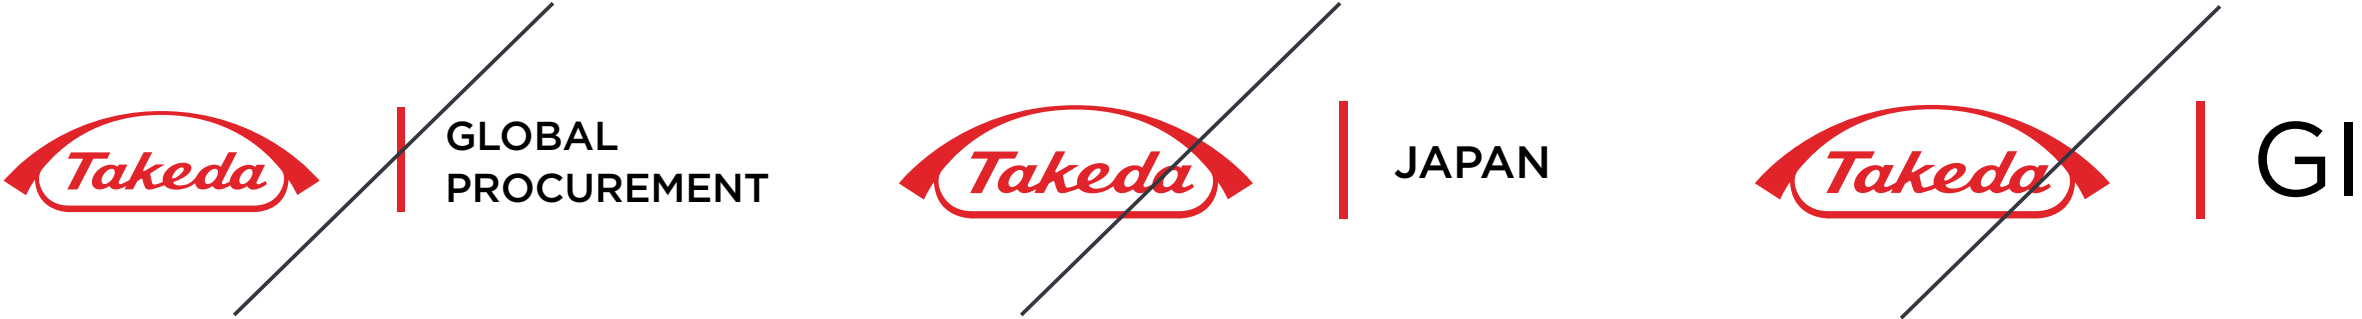

Do not use unauthorized color combinations

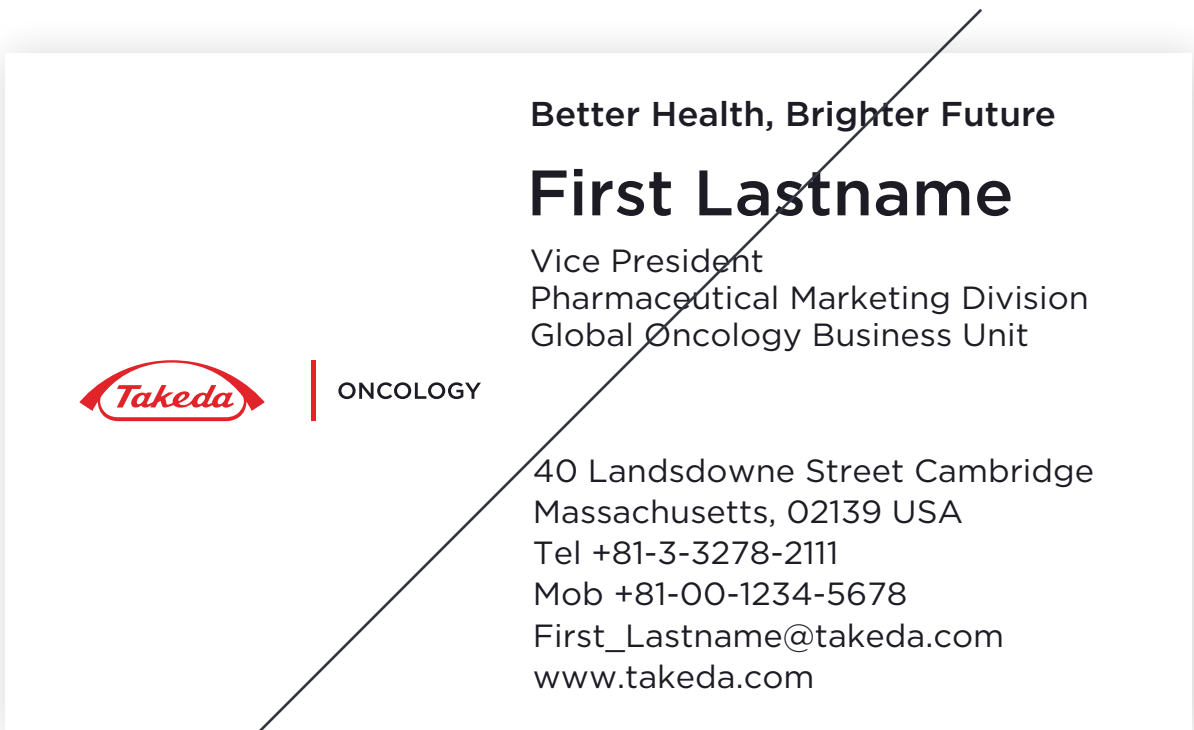

Do not change or invert the colors of the Dakiyama

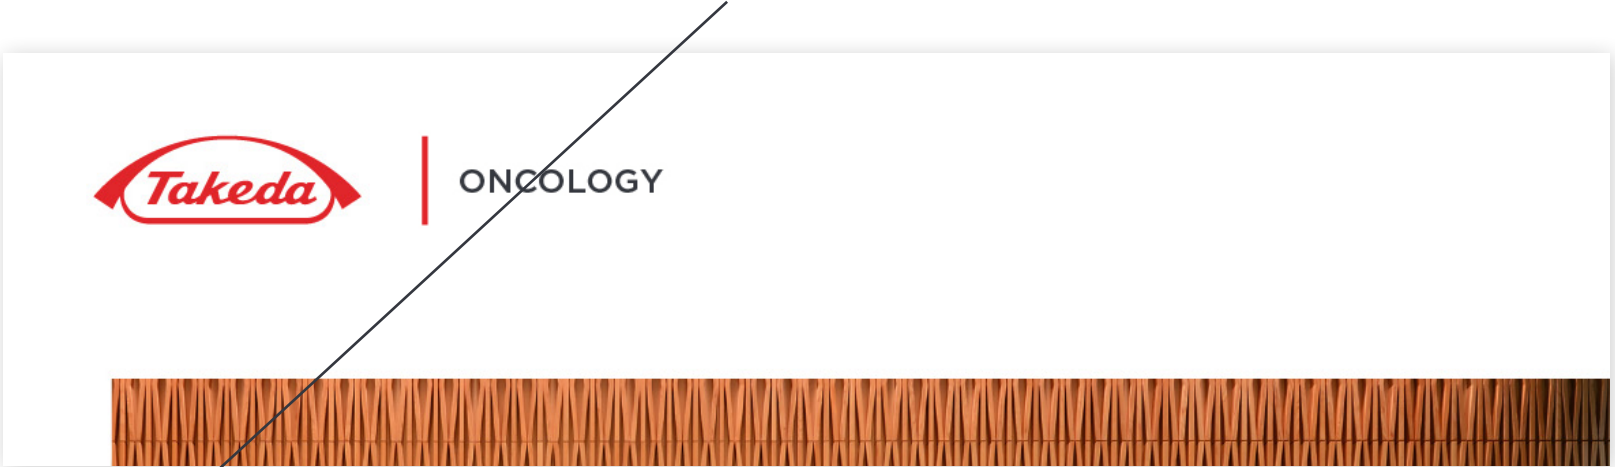

Do not create new combinations or abbreviations

Do not use on materials that represent Takeda as a whole

Do not use the secondary layout when the primary layout can be used (example: brochure header)
